

Buzzi

Expect LFL sales down slightly in Q1-2026E

Buzzi will provide a Q1-2026E trading update (revenues only) on 13 May and based on our recent conversation with the company, we expect the company to report a LFL sales decline of 0.4% to €974m driven notable by 1) adverse weather conditions in Italy in Q1 where volumes are expected to be down high-single-digits; 2) double-digit volume decline in Poland; and 3) both volumes and pricing down double-digit in Russia. However, we do note on the supportive side, pricing is up low-single-digits in Europe and the US should see volumes up high-single-digits helped also by an easier comparative basis; pricing is also up double-digits in Brazil. Within the quarter, we also note the scope impact of its UAE business, which is expected to contribute ~€37m in revenues. As a reminder, FY26 guidance is that Buzzi considers it likely that in 2026 recurring EBITDA will experience a slight contraction compared with the previous year though management said that it would provide the market with more precise guidance as soon as they gain clearer visibility on short-term development.

Summary Investment Thesis and Valuation

Investment Thesis

We are OW Buzzi given 1) our expectation of a less ‘aggressive’ phase out of free ETS allowances and how this will impact the company, 2) their favourable exposure to Germany and related infrastructure spending, and 3) an attractive valuation, especially in light of the weak share price performance YTD. From a valuation perspective, the shares appear compelling on 4.2x 2027E EV/EBITDA vs. the sector on 8.0x. Furthermore, our implied SOTP for Buzzi screens attractive whichever way you look at it, either showing the Implied US Heavyside business on 0.6x, or the implied European Heavyside business on negative 1.8x.

Valuation

We derive our price target from an EV/EBITDA-based valuation methodology with an enterprise value (EV) calculation. Our price target is derived using 6.0x EV/EBITDA multiple (a discount to the peer group given: i) lower decarbonization efforts; ii) lack of corporate actions; and iii) historically lower valuation versus peers) and applying this to our adjusted 2027 EBITDA estimates (incl. JVs) to get to our price target. Definition of enterprise value: We use the following formula to calculate EV: (Current Market Capitalization) + (Net Debt) + (Fair value of minorities) + (Other EV includes the following: 1-unfunded pension liabilities, 2-provisions for fines, etc.).

Risks to Rating and Price Target

Better-than or worse-than-expected trends in volumes/pricing in Italy, the US and Germany could result in upside/downside risk to our earnings estimates. Energy costs form a major part of the group’s cost base and therefore can have a major impact on the group’s profitability. Given the high exposure to the US (60% of EBITDA), the euro-dollar exchange rates can also have a major impact on the group’s profitability.

Buzzi (BZU.MI, BZU IM) Price Chart

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends. Initiated coverage Jun 14, 2006. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan’s continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
