

## RoboTechnik (300757.SZ): Increasing orders for SiPh/ CPO/ OCS equipment; Key enabler for Photonics back-end manufacturing; Buy

**Robotechnik provides a full coverage portfolio for the assembly/ testing process of photonics manufacturing.** We expect a strong ramp up of orders ahead, along with the ongoing tight supply of photonic components for optical transceivers, and the rising demand of photonics products in scale up, scale out, scale across connections in data centers. Despite short-term miss in 1Q due to soft Photovoltaic segment ([Read more](#)), we expect the company to sustain its technology leadership in SiPh / CPO/ OCS equipment, and see it as a major beneficiary of the rapidly growing optical innovation cycle. **Maintain Buy with TP up to Rmb788.**

**Benefiting from the capacity expansion / build out of silicon photonics modules, CPO and OCS.** For high speed optical modules and optical engines, assembly and testing are important manufacturing steps to improve production yield. Robotechnik specialize in back-end equipment for photonics devices, providing a broad product portfolio across die bonding, lens/ fiber attach, fiber preparation, prober, and tester etc. Growing with the increasing applications of optical connections, Robotechnik has announced Rmb1.4bn+/ US\$200m+ of contract wins since the beginning of 2026 ([Exhibit 1](#)), comparing to Robotechnik's 1Q revenue run rate of Rmb164mn. Robotechnik has been working with global leading customers on developing the next generation technologies, including CPO and OCS, which will notably benefit the company's long-term upside when these new solutions are put into use in the next few years.

**Earnings revision:** we reduce 2026-28E net income by 15%/ 10%/ 2% and raise 2029/30E by 1%/ 2%. We revise down 2026-28E due to the softness in Photovoltaic related business, which we believe will impact both revenues and margins and need time to recover. We become more positive on the long-term potentials of Robotechnik's photonics manufacturing tools, and therefore raise the revenues for 2029 and beyond.

**Valuation:** With updated earnings estimates and multiple, we raise our **12m TP** by 14.5% to **Rmb 788 (vs. Rmb688 previously)**, based on 55.9x 2031E discounted P/E (vs. 50.0x previously). Our 2031E target P/E multiple of 55.9x is based on the correlation between peers' PEG&M (2026E P/E to 2027E NI YoY and OPM), with RoboTechnik's 2032E net income YoY at 39% and 2032E OPM at 24%. We apply the 55.9x target P/E to 2031E EPS and discount it back to 2027E with a COE of 11.3% (COE unchanged). Our TP-implied 2027E P/E is 254x, close to the average +1std forward trading P/E.

**Exhibit 3: Our 2031E target P/E multiple is derived from peers' 2026-27E PEG&M**

**Price Target Risks and Methodology - RoboTechnik**

**Valuation:** Our 12-month target price of Rmb788 is based on a 55.9x 2031E P/E, discounted back to 2027E at a COE of 11.3%. Our target multiple is derived from the correlation between consumer electronic peers' PEG&M (2026E P/E to 2027E NI YoY and OPM), with RoboTechnik's 2032E net income at 39% YoY and 2032E OPM at 24%.

**Key downside risks:** Fiercer-than-expected market competition; lower-than-expected optical connection end demand; worse-than-expected photovoltaic market downcycle.
