## ASCO Takeaways – Sigvotatug Vedotin Represents Near-Term Focus In Oncology

Exiting our meeting with PFE's oncology leadership team (Jeff Legos – Chief Oncology Officer, Johanna Bendell – Chief Development Officer of Oncology, and Tina Deignan – President of Oncology Commercial), we see near-term focus within PFE's oncology portfolio as remaining on Sigvotatug Vedotin (SV) in NSCLC. Here, we anticipate a Ph3 readout for SV in the 2L+ NSCLC setting (monotherapy vs chemo) in 2H26 with the product's recent protocol amendment (OS vs prior PFS/OS) having raised some questions on the drug. And, as we look to the larger 1L opportunity for SV, we note that the evolving treatment landscape (i.e. this weekend's sac-TMT data) increases uncertainty on where SV will ultimately fit in the treatment paradigm.

- PFE views the recent changes to the SV 2L+ NSCLC primary endpoint as benign.** Last week, Pfizer announced a protocol amendment to the ongoing Ph3 trial of SV in the 2L+ NSCLC setting with OS now the sole primary endpoint (previously OS & PFS as co-primary endpoints). Importantly, PFE noted that 1) the decision was made purely based on the importance of OS in the setting (i.e. primary question they are looking to answer) while 2) the company remains blinded to all data & the event goal has not yet been reached, and 3) this change was brought forth by PFE (vs the FDA). Additionally, the change does not impact the timeline of the readout (2H26). While a successful OS readout would clearly position SV well in the 2L setting (and single-arm Ph1 efficacy has looked promising), the change to the trial protocol this late in development does raise some questions on the study.
- Evolving 1L NSCLC landscape increases potential competition to SV.** Overall, we see the 2L+ trial for SV as reading through to the opportunity in 1L, where PFE is studying SV in combo with Keytruda in pts with PD-L1 50%+ (2027 readout). At the same time, we note that the evolving SOC in the first-line setting increases uncertainty on where SV will ultimately fit in, particularly as we think about emerging data for MRK's TROP2 (sac-TMT) from this year's ASCO.
- Strong Harmoni-6 data has a positive read-through to PFE's own VEGFxPD1 bispecific.** Harmoni-6 (Ph3 China trial of Ivonescimab + chemo vs Tislelizumab + chemo in 1L squamous NSCLC) showed an HR of 0.66 on overall survival, coming in ahead of expectations (0.70-0.80). And while there remain a number of uncertainties (translatability to global data & applicability to the broader non-squam opportunity), we see this data reading through positively for the broader class, including PFE's own bispecific.
- From here, there remain a number of oncology catalysts to watch over the next two years.** These include Ph3 data for Mevrometostat in prostate & expansion of Elrexfio into earlier lines of multiple-myeloma (2026), the Kat-6 inhibitor in 2L mBC (2027), the CDK-4 in 1L mBC (2028), and additional VegFxPD-1 updates (where PFE's 1L NSCLC trial has a PDC of Feb 2029).

- **Other Comments**

- Padcev growth in 1Q (+40% YoY) was driven by some re-acceleration in the mUC setting, while PFE is also seeing some nice early uptake in MIBC (in the cisplatin ineligible population), though time is needed to understand how the post-operative dosing scheme works out.
- The recent Innovent deal helps PFE build out a portfolio of programs near / around IND and build out a dual payload engine.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

**Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:**

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
