Asia Leaders Conference 2026
Aug 31-Sep 2, 2026
Explore >

We hosted Range Intelligent's CFO at the GS Asia Leaders Conference in Hong Kong on Sep 1.

Key takeaways: i) Mainland China: The company has successfully expanded AIDC services as the core revenue driver and may step up computing power acquisition in 2H26 following surging prices in 1H26, while only securing high-margin orders with selective, low-risk customers. **ii)** Overseas: Management aims to leverage prefabricated modular cabinets and human resources capabilities to accelerate capacity delivery in Hong Kong and Batam, and 1GW overseas delivery in next 3-5 years. **iii)** 5.4GW secured resources domestically by positioning data centers next to strategic tier-1 hubs; the company has stepped up capacity delivery pace since 2025 to capture the robust customer demand with long-term contracts; **iv)** Management expressed confidence in sustained financial performance momentum with strong historical compounding growth and low financing costs.

Business overview

- **Growth strategy:** The company started in 2009 focusing on traditional IDC cabinet colocation and expanded into AIDC business (including computing power rental and full-stack solutions) around 2022-23. The current strategy focuses on domestic AIDC business (higher revenue contribution vs. IDC for the first time in 1H26) and expanding IDC business in overseas markets.
- **Customer mix:** In terms of end-customer contribution, Range now sees more even revenue contribution from top 3 customers, with No.1 and No.2 customers each contributing to c.30% and No.3 customer contributing c.15% revenue.
- **Capacity resources:** Range operates 9 campuses globally with 6GW of total resources (5.4GW domestic, 0.6GW overseas), up significantly from 2-3GW in 2022. Domestic campuses are strategically positioned next to tier-1 hubs (i.e. Langfang next to Beijing, Pinghu next to the Yangtze River Delta, Foshan next to Guangzhou, Huizhou next to Shenzhen, Chongqing, Lanzhou, and Hainan).

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Capacity in service has reached c.1GW as of late, including recent new capacity delivery in Chongqing, Huizhou and Langfang.

AIDC business

- **Computing power:** Capex spending remains heavily focused on computing power acquisition. After temporarily slowing down in 1H26 due to surging GPU prices, company may increase GPU procurement in 2H26 depending on pricing trends and chip availability across supply chain. Important accounting items to monitor include fixed assets, construction in progress, prepayments, capex and depreciation for AIDC business. Fixed assets increased by Rmb116mn in 2025, among which c.Rmb100mn is related to AIDC business.
- **GPM:** Company prioritizes margin over volume for AIDC business and is highly selective of customer profile to secure quality orders with low customer default risk. The company achieved 45% GPM on AIDC business in 1H26, significantly outperforming the 20-25% avg. level for typical computing power rental companies. Company targets a 3-year payback period for standard 5-year contracts with fixed pricing, backed by a 100% remaining-value penalty fee for early termination to mitigate financial risks.
- **Liquid cooling:** Liquid cooling capabilities/components remained undersupplied in the market in 1H26. The company successfully deployed liquid cooling across 65% of its domestic AIDC infrastructure and plans to deploy liquid cooling to 100% of its overseas IDCs.

Overseas expansion

- **Hong Kong campus** is positioned as the largest campus in Hong Kong with 240MW capacity backed by a Rmb21.8bn investment over the first three years, benefiting from lower land costs at c.1/10 of the market average and a 24-hour round-the-clock construction schedule. Management is constructive about the construction pace to date and expects the first building to be powered up before Jul 2027. Hong Kong data center market is a seller's market with GPM at 57% on average. Demand is high, and all capacity through 2027 has been sold out.
- **Batam campus** sees 60MW scheduled for delivery in 4Q26. Overseas expansion is heavily supported by prefabricated modular data center shipments from China. The company plans to manage the investment pace before obtaining power.
- Range aims for **1GW overseas delivery** in next 3-5 years.

Financials

- **Growth outlook:** Since listing publicly in 2022, the company has maintained a 4-year CAGR of 30% across revenue, EBITDA, and net profit. Management aims to maintain a 30% CAGR in next 5 years, targeting an operating cash flow of Rmb20bn by 2030E (v.s. Rmb6bn in 2026E).
- **1H26 results:** Total revenue grew by 50%+ yoy, yet the slower computing power acquisition affected AIDC revenue growth somewhat. Adjusted net profit also achieved 50%+ growth, excluding public REIT deconsolidation in 2025.

- **Balance sheet:** Debt-to-asset ratio remains healthy at below 65%. The company enjoys relatively low financing costs (as low as 1.7% for 3-year bank loans), and high founder ownership (50%+).

Investment Thesis - Range Intelligent

Range Intelligent is one of China's largest data center operators in terms of live capacity (750MW as of 2025) and reserved capacity (6GW as of late, the majority of which has secured power quota approvals). We are Buy-rated as we see Range Intelligent as one of the fastest growing data center operators in China, with 27%/33% utilized IT capacity/revenue CAGRs for 2025-30E. This growth is supported by its: 1) rich capacity reserves to capture rising computing cluster demand, 2) full-stack AIDC capabilities to enable long-term operational stability and technology investments, 3) strong customer relationships with reduced customer concentration, and 4) diverse, low-cost financing capabilities. We expect the company's GPU-as-a-Service (GPUaaS) investments to generate incremental profitability in a favorable demand and pricing environment. Furthermore, we are positive about its overseas expansion initiatives to capture rising AI demand in the APAC region in the long term, which leverage Range's supply chain and human resource capabilities.

Price Target Risks and Methodology - Range Intelligent

Valuation: Our 12-month target price of Rmb117 is based on an 18x 2030E EV/EBITDA discounted back to end-2026E at a 10% CoE. The 18x target EV/EBITDA multiple is a weighted average of: i) a 25x target EV/EBITDA multiple to the DC operation EBITDA and ii) a 10x target EV/EBITDA multiple to GPUaaS.

Key risks: 1) Lower-than-expected order wins amid a competitive environment; 2) Slower-than-expected utilization rate ramp-up; 3) Larger-than-expected pricing pressure; 4) Worse-than-expected execution in overseas expansion; 5) Changes in chip availability due to regulatory changes, domestic capacity ramp-up delays, etc; 6) Difficulties in financing.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
