Asia Leaders Conference 2026
Aug 31-Sep 2, 2026
Explore >

We hosted Kingsoft Corp (3888.HK, Not Covered) CFO at GS Asia Leaders Conference in Hong Kong on Aug 31.

Key highlights: 1) The company's shareholder return framework includes fundamental value accretion of respective assets, value creation from synergistic collaboration on AI and holding-company discount reduction, with Xiaomi accumulating its equity stake to 8.1% as of late; 2) Growth of office applications is threefold with rapid office collaboration monetization growth and prudent investments in AI agents; 3) Gaming business faces near-term pressure over the next 2-3 quarters, but sees potential turnaround in 2027 driven by JX Online 3 2.0 and new pipeline titles; 4) Cloud infrastructure is pivoting towards AI computing plus MaaS, capture demand from Xiaomi/Kingsoft ecosystem and mid-sized AI, robotics and smart driving companies.

- **Ecosystem progress on AI collaboration**
  - Scalable revenue stream from Xiaomi x Kingsoft Cloud collaboration, as KC provides computing power to support Xiaomi's model, EV and robotics initiatives.
  - Early-stage AI deployment in gaming and office: Kingsoft has started deploying AI in game R&D and content generation from early 2026, and MiMo x WPS integration has already started e.g. MiMo Claw x Kingsoft Office.
  - Under exploration: MiMo x Kingsoft Cloud x WPS as a full-stack AI solution for enterprises and public-sector customers that need models, computing power, private deployment, document workflows, enterprise knowledge, and permission governance.
- **Office applications: three-layer growth framework**
  - Foundational document and content services as Layer 1: WPS Office benefits from mobile app distribution, domestic substitution, and freemium monetization model, in addition to AI services plugged in at

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. scale since 2023. Overseas revenue remains single digit as % revenue but is growing quickly thanks to its 1/4-1/3 pricing vs. Microsoft Office.

- Office collaboration as Layer 2: WPS 365 revenue grew 60%+ yoy in 2Q26. It competes with Teams, WeCom, and DingTalk, but focuses more on enterprise and government users, private deployment, and complex document capabilities.
- AI agents as Layer 3: Lingxi (to-C) and WPS Comate (to-B) compete with products such as WorkBuddy and QwenWork. New products launched in July focus on document processing, calculation, and presentation, with MiMo capabilities integrated. Kingsoft is not yet aggressively pushing Lingxi to WPS users due to high token costs, and the company's near-term priority is to identify the right monetization model and integrate with MiMo more deeply to enable more value-for-money AI services.

- **Gaming: near-term pressure, but potential 2027 turnaround**
  - Gaming revenue declined 19% yoy in 1H26 and the segment is expected to be loss-making this year with a larger yoy revenue decline in 3Q26. The key issue in 2025 was strategic misallocation from continued investment in Mecha BREAK, which came out below expectation and led to insufficient headcount reduction and deteriorated user experience for the core JX Online series.
  - Key strategic focuses: i) evergreen IP operation for JX Online 3 including improved image quality and stable content supply for JX Online 3 2.0; ii) AI-driven efficiency improvement to reduce trial-and-error and enable higher game production efficiency (e.g. a new game developed with c.20 R&D staff and scheduled for year-end launch); iii) multi-layer game operation including Goose Goose Duck as a high-DAU, low-ARPU game with overseas launch next year, two games affiliated with Angry Birds including a classic return version launching with the movie in Dec.

- **Cloud infrastructure: pivoting towards intelligent computing plus MaaS**
  - Positioning is focused on intelligent computing power for mid-sized companies, including AI, robotics and smart-driving companies, plus higher-margin MaaS opportunities.
  - Growth is coming from both internal ecosystem demand from Xiaomi and Kingsoft, and non-ecosystem customers.
  - In 1H26, Kingsoft Cloud revenue grew 34% yoy and non-GAAP operating profit turned positive. For details see Kingsoft Cloud 2Q26 review.

- **Shareholder return framework**
  - The shareholder return framework includes three drivers: fundamental asset value accretion, synergistic value creation, and potential holding-company discount reduction.
  - Core asset value components are worth (based on market prices) HK$64.2bn for Kingsoft Office (51.4% stake), HK$8.2bn for Kingsoft Cloud (33% stake),

and HK$13.9bn parent-company cash. Combined asset value of c.HK$86bn implies c.HK$63/share and a 70% holdco discount.

- Shareholding structure: Chairman Lei Jun owns 12.7%, while Xiaomi has been buying shares from open markets to increase its equity stake to 8.1% as of late.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
