We hosted AMEC management on Sep 8 in Shanghai during our China AI Tour. Key discussions focused on (1) order momentum and outlook, (2) SPE component supply, and (3) advanced product expansion. Overall, management notes the strong order growth from memory and advanced nodes clients, and expects to see sequential growth by quarters ahead. As the local etcher leader, the company continues to expand deposition, advanced packaging tools and gain traction with clients. For upstream materials, management notes the company cooperates with both global-tier and local SPE component suppliers to better secure the supply and product delivery. We are positive on the rising generative AI trend to drive local clients' demand on advanced nodes, benefiting AMEC as a leading local SPE supplier with advanced product offerings. Maintain Buy. Read more: Chips IV.

Key takeaways

1. Roll-out of new deposition products: During the CSEAC 2026 in Sep, management notes the company released four deposition tools, which covers 3D memory and advanced logic demand, including (1) Performo QuaStar GE/ ON, offering higher speed and better performance of deposition; (2) Prefima Unicore AM: ALD tools for more layers of memory chips; (3) Preforma Uniflash SPTi/ TiN: the company has started to gain small volume orders from clients; and (4) Prismo PDS8 for SiC epi-wafer. As the local etcher leader, we are positive on company's expansion to new deposition tools and enhanced products to capture growth from advanced solutions.

2. Advanced products in expansion: AMEC launched the 70:1~90:1 high aspect ratio etcher Primo XD-RIE during CSEAC for high-end memory demand, enabling the stable and efficient operation of the tool. Management notes the company has started the product verification of 90:1 high aspect ratio etcher, and expects to see gradual orders in late 2026 or 2027E. Management notes the company prioritizes the new technology development over pricing when collaborating with clients to maintain its edge.

Price Target Risks and Methodology - AMEC

Valuation: We are Buy-rated on AMEC with a 12-month target price of Rmb577, which is based on 56x 2030E discounted P/E (discounted back to 2027E). Our target P/E is derived from correlation between peers P/E to the sum of NI YoY and OPM.

Key downside risks: (1) Current trade restrictions do not specifically target matured

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. node fabs, but if restrictions were to expand to matured nodes, it would further reduce demand for AMEC's products. (2) AMEC supplies etchers that can be used for 5nm production lines overseas (i.e., advanced nodes); if its ability to supply such products is hindered, it could lead to further downside risks. (3) Weaker-than-expected capex of major foundries in China

GS Factor Profile

The Goldman Sachs Factor Profile provides investment contextor a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. Theour key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranksor specific metricsor each stock. The normalized ranksor the metrics are then averaged and converted into percentilesor the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is asollows:

Growth is based on a stock'sorward-looking sales growth, EBITDA growth and EPS growth (or financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock'sorward-looking ROE, ROCE and CROCI (or financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock'sorward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (or financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analystorecasts at the fiscal year-end at least three quarters in theuture. Growth uses inputs or the fiscal year at least seven quarters in theuture compared with the year at least three quarters in theuture (on a per-share basisor all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitativeactors and quantitativeactors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and thereore does not actor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied

upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
