September 8-11, 2026 | San Francisco
Explore >

Companies from the US Semiconductor sector presented during Day 3 of the GS Communacopia + Technology Conference, including Nvidia, Lam Research, Seagate, Credo, Qnity, Skyworks, and EPAM. **We highlight key takeaways on the top debates, along with company-specific takeaways for each sector below.**

Takeaways for US Semiconductors

Key Takeaway #1 - AI Macro Trends and Digital Semis: Companies continued to strike a very bullish tone on the trajectory of AI infrastructure spending, with Nvidia's Jensen Huang reiterating his outlook of AI infrastructure spending of $3 - $4tn in 2030. Both elements of the supply chain remain tight - including upstream (components) and downstream (land/power/datacenter capacity) supply, even as companies continue to add more capacity to cater to structurally higher levels of demand. On the margin, our view is that downstream constraints could be more significant. Consistent with Day 2's takeaways, companies cited concrete ways in which they are implementing AI in their internal business processes to drive incremental revenue growth via new product development and faster innovation cycles in services. Companies also cited their use of internal AI tools to drive cost efficiencies.

- **Nvidia:** Nvidia reiterated its outlook of AI infrastructure spending of $3 - $4tn in 2030, and noted that its co-design capabilities - software, system, and components - as a source of competitive differentiation. Mr. Huang noted that upstream and downstream supply constraints remain significant. Management noted that its financial guarantees are designed to help seed the ecosystem, but the ultimate returns generated and variety of investment partners involved are inconsistent with the notion of circular financing. Finally, Mr. Huang is bullish on physical AI, with self-driving cars as an existing use case, and expects reasoning-based manipulation and 6G to be additional drivers of physical AI in the next few years.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

- **Credo:** Credo struck a bullish tone on its growth trajectory beyond FY27, with multiple vectors of growth in its optics portfolio, even as its copper-based AEC solutions are expected to remain mainstream in the medium term. Credo also noted that customer engagements across its optics products remain strong, and continue to broaden. Finally, Credo expects gross margins in FY27 to remain at similar levels to FY26, with OpEx growing 55% in FY27 before trending toward a more normalized revenue to OpEx ratio of 2:1.
- **Lam Research:** Lam emphasized its own use of AI to drive both productivity and growth, including training models on 30 years of proprietary data to enhance customer service, accelerate issue resolution, and improve employee efficiency.

Key Takeaway #2 – Semiconductor Capital Equipment, Foundry, and Storage: Companies continued to focus on their exposure to datacenter buildouts as a multi-year structural growth driver. Almost universally, companies are seeing significantly increased orders and backlog, driving visibility that was broadly described as historically unprecedented. Although WFE companies stopped short of providing quantitative guidance for 2027, we believe commentary around 8-10 new fabs coming online in 2027 is supportive of WFE acceleration. AI inference is driving structurally higher levels of data usage for context windows, which is driving higher levels of mass storage demand. The trend toward multi-chip integrated packages used in AI infrastructure is also driving higher levels of growth in advanced packaging and PCB structures.

- **Lam Research:** Lam expects WFE growth in 2027 to be driven by DRAM, followed closely by leading edge foundry/logic and a resurgence in NAND. The company noted increasing 3D architectures are driving additional demand for process technologies such as through-silicon vias (TSVs), and also creating further equipment content growth opportunities. Lam Research highlighted that a richer mix of differentiated products, manufacturing and R&D capabilities closer to customers, and higher pricing are improving its value proposition, enabling stronger value capture over time, and take gross margins close to mid-50% range over the next several years.
- **Qnity:** Management highlighted outsized growth in advanced packaging and interconnect solutions as key growth drivers for the company in the near term. Broadly, the company sees advanced node transitions as a structural tailwind, although it added that trailing-edge nodes have begun to recover, benefiting its semiconductor segment. Qnity sees continuing revenue momentum, combined with steady margin expansion, as providing a further boost to near-term earnings power.
- **Seagate:** Seagate sees the current demand environment for storage tied to AI infrastructure, combined with limited supply growth, continuing to support pricing uplift with higher earnings through FY27. Management reiterated that HAMR volumes are well on track to cross over PMR by the end of calendar 2026, and added that it believes HAMR will represent 80%-90% of the company's bit
next few years. Seagate also expects to continue its high-yield debt
plans, and to accelerate share repurchases - which it sees as the pri
returning excess capital to shareholders.

Key Takeaway #3 – IT Services: Against a backdrop of muted client spe

verticals, EPAM continues to see headwinds persisting throughout the remainder of the year. Despite this weaker demand environment, the company expects to maintain solid gross margins given a combination of pricing tailwinds and a move toward fixed-price contracts.

- **EPAM:** Management discussed the weaker demand environment and certain idiosyncratic challenges which drove its recent downward guidance revision. However, the company continues to see traction for its AI-native service offerings, even if talent acquisition has proven to be challenging. EPAM believes that it could begin to see revenue improvement in the coming quarters, but noted that it expects operating margins to remain in the 15%-16% range for FY27.

Key Takeaways from Qnity presentation

Presenters: Jon Kemp, CEO

- **Advanced node momentum continues, while trailing-edge is recovering:** Management highlighted accelerating advanced node sales, which grew 20% in the prior quarter, and described the migration to 3 nm nodes as a tailwind for Qnity. Additionally, management was also constructive on mature logic, and together with advanced nodes, the company sees continued sequential growth through 2H and into 2027 for the Semiconductor Technologies segment.
- **Interconnect Solutions:** The interconnect segment remains a key growth driver for the company given continued strength in advanced packaging and AI PCBs, which represents ~30% of the segment. Management noted that ICS continues to outperform and expects that trend to continue over the next year. Qnity has guided for the segment to be up mid-single QoQ in 3Q26.
- **Margins:** Mix and input cost headwinds led some gross margin pressure relative to our expectations last quarter, but going forward, Qnity expects margins to move steadily higher with potential upside from ICS mix, despite continued input cost increases, and increased operating leverage. The company sees gross margins expanding toward the 50% range over the long term.

Key Takeaways from Nvidia presentation

Presenters: Jensen Huang, Founder, President & CEO

- **2030 TAM Outlook:** Nvidia reiterated its view that AI represents a $3tn-$4tn TAM opportunity by 2030, driven by the shift from retrieval-based computing to generative computing, which requires a fundamentally new layer of compute infrastructure. Management also emphasized that the slowing of Moore's Law increases the value of Nvidia's tightly co-designed hardware and networking stack, including NVLink and scale-up / scale-out architectures, as customers seek higher performance and efficiency. Mr. Huang noted that Nvidia is capturing more wallet share in overall AI CapEx by providing more value to its customers.

- **Return on Investments:** Mr. Huang highlighted coding as one of the most compelling GenAI applications today and sees cyber security as a major AI opportunity, with AI-powered coding and software development driving significant productivity gains while enabling more advanced security capabilities.
- **Supply:** Mr. Huang acknowledged broad-based upstream supply constraints across advanced packaging, wafers, memory. Mr. Huang also noted datacenter infrastructure such as power and site availability is also constrained, but emphasized Nvidia's ecosystem scale and deep customer visibility as key advantages in navigating these downstream bottlenecks. Despite ongoing supply tightness, management reaffirmed its expectation for ~70% YoY growth in CY27.
- **Financial guarantees:** Mr. Huang discussed the financial guarantees and commitments as Nvidia is supporting the growing AI ecosystem to secure datacenter capacity. Mr. Huang noted that it helps seed the ecosystem, but the ultimate returns generated and variety of investment partners involved is inconsistent with the notion of circular financing.
- **Physical AI:** Mr. Huang struck a bullish tone on Physical AI, highlighting autonomous vehicles as a leading use case and pointing to emerging applications such as warehouse automation and navigation systems. He expects the next major inflection to come from reasoning-based manipulation systems, which he believes is roughly two years away, and also sees 6G-enabled systems as another Physical AI use case.

Key Takeaways from Lam Research presentation

Presenters: Doug Bettinger, EVP & CFO and Ram Ganesh, Head - Investor Relations

- **Customer demand visibility:** Lam Research noted that cleanroom availability remains a key capacity constraint, with additional capacity expected to come online through the end of 2027. Management highlighted strong customer engagement around 2027 demand and longer-term growth trajectories, using these discussions to refine its production plans and coordinate supply chain investments with key suppliers.
- **WFE growth in 2027:** Lam Research expects DRAM to be the largest driver of WFE growth in 2027, followed closely by leading-edge foundry/logic and NAND. While management did not quantify overall WFE growth, it noted that DRAM spending is closing the gap with leading-edge foundry/logic relative to 2026, reflecting strengthening leading edge foundry/logic investment trends.
- **3D architectures driving strong demand for Lam:** Lam Research highlighted Gate-All-Around (GAA) and backside power as major technology inflections, noting that each incremental 100k wafer starts can expand its SAM by roughly $1bn. Management also emphasized that advanced packaging and memory are becoming increasingly 3D in nature, driving additional demand for process technologies such as through-silicon vias (TSVs) and creating further equipment content growth opportunities.
- **Return on Investment (ROI) for Lam and supply chain:** Lam Research highlighted

strong, AI-driven demand across its customer base, with the semiconductor supply chain investing in lockstep to support a structurally higher level of compute demand. Management also emphasized its own use of AI to drive both productivity and growth, including training models on 30 years of proprietary data to enhance customer service, accelerate issue resolution, and improve employee efficiency.

- **CSBG:** Lam Research highlighted strong momentum in its Customer Support Business Group (CSBG), driven by high wafer-fab utilization rates, an inflection in NAND upgrade activity, and resilient mature-node investments. Management expects these factors to continue supporting healthy growth in the services business.
- **Margins and pricing:** Lam Research highlighted that a richer mix of differentiated products, manufacturing and R&D capabilities closer to customers, and higher pricing are improving its value proposition. Management expects these factors to support stronger value capture over time, and take gross margins close to mid-50% range over the next several years.
- **China:** Lam Research noted China CapEx is growing, but slower than other regions. While Lam noted there are areas where the company cannot sell due to export controls, Mr. Bettinger is confident in the company maintaining share where it can sell.

Key Takeaways from Seagate presentation

Presenters: Gianluca Romano, CFO

- **Pricing trends:** Solid ongoing demand trends and the higher value of storage remain supportive of strong pricing uplift, and management sees sustained momentum through FY27 following an ~11% YoY increase in price per exabyte last quarter. It sees applications such as autonomous vehicles and the attractive TCO of storage as supporting continued exabyte demand strength.
- **HAMR volumes:** HAMR volumes have been ramping throughout the quarter and remain well on track to cross over PMR on an exabyte basis by the end of CY26. Management also added that Mozaic 4 has been qualified with customers in the US and Asia, which have provided positive feedback. Seagate expects HAMR to represent 80%-90% of its volume in a few years, though it sees a role for PMR in its portfolio for lower capacity drives.
- **Capital returns:** Management remains focused on retiring more of the company's high-yield debt, and plans to repurchase an additional high-yield note next quarter. It indicated that it will consider an increase to its dividend in the near term, but added that it plans to accelerate share repurchases which it sees as the primary vehicle for returning excess capital to shareholders.
- **Supply additions:** Seagate emphasized the need for the industry to remain disciplined on supply additions and reiterated that it views node transitions, rather than higher unit shipments, as sufficient for appropriate exabyte growth in the near term. The company also noted that it remains disciplined on CapEx, given the

possibility that datacenter customers may eventually face other bottlenecks, which could impact demand.

- **Financial outlook:** Management continues to expect sequential increases for both revenue and EPS throughout FY27, and we expect it to deliver at least 70% incremental gross margins during the period given the HAMR transition, cost benefits from its internal lasers, and pricing tailwinds.

Key Takeaways from Credo presentation

Presenters: Bill Brennan, President and CEO and Dan Fleming, CFO

- **Copper vs Optical:** Credo highlighted that although its innovation has helped extend the relevance of copper interconnects, the company's investment focus over the past two years has increasingly shifted toward optics. Management expects copper to remain the preferred solution for short-reach links due to its reliability, while optical connectivity will gain share at longer distances, creating a significant growth opportunity for Credo across both microLED and laser-based architectures.
- **Growth algorithm beyond FY27:** Credo expects its growth beyond FY27 to be driven by the ramp of its optical portfolio, including PICs and ZF optical transceivers that address reliability challenges in AI networks. Management also highlighted continued AEC proliferation at existing customers, expanding deployments at neocloud customers, and initial contributions from Active LED Cables (ALCs), creating multiple growth vectors into FY28 and beyond.
- **Customer engagements in optics:** Credo highlighted growing customer engagement for its ZF Optical portfolio, which is designed to reduce network downtime caused by link flaps and improve reliability in AI clusters. Management also emphasized the potential of its upcoming ALC products, which leverage micro-emitter technology to extend reach from ~7m to ~30m with comparable reliability, while reducing cable volume by ~75% versus AECs. ALCs are expected to launch at OCP next month and enter customer qualification thereafter, followed by volume production in FY28.
- **AEC business:** Credo highlighted continued strength in AECs as a key medium-term growth driver, benefiting from the increasing densification of AI networks and the industry's transition to higher lane speeds, both of which drive greater connectivity content and demand for its solutions.
- **Competitive trends:** Credo emphasized its differentiated system-level approach, taking ownership of the entire connectivity solution rather than supplying individual components. In optical transceivers, the company is focused on high-value, reliability-enhancing solutions rather than commodity IEEE-standard 1.6T products, allowing it to command higher ASPs. Management also highlighted its vertical integration strategy, including in-house DSPs and silicon photonics PICs, which strengthens product differentiation, improves reliability, and supports higher gross margins.
- **Financials:** Credo reiterated strong near-term growth, guiding to ~20% QoQ

revenue growth in FY3Q and ~30% QoQ growth in FY4Q. Management expects FY27 gross margins to remain consistent with FY26, while OpEx is expected to grow ~55% YoY in FY27 before trending toward a more normalized revenue-to-OpEx ratio.

Key Takeaways from EPAM presentation

Presenters: Balazs Fejes, President & CEO, and Jason Peterson, CFO

- **Strategic and Macro.** EPAM expects weaker discretionary spending through the remainder of 2026 as clients remain cautious on their overall spending envelope - especially in traditional practice areas and certain verticals where demand is being impacted by oil prices and the conflict in the Middle East. Management also cited shortfalls in sales execution in the US as contributing to the recent downtick in the company's guidanceor 2026.
- **Generative AI.** EPAM continues to see tractionor its AI-native service off erings, which drove over $160mn in sales in 2Q, and expects 2026 generative AI revenue of at least $600 mn. The company continues to see strength in areas such as AI-native software engineering, though it noted that many customers are approaching agentic automation with a goal of remaining within the same budget envelopes, which it sees as a challenging dynamic.
- **Workforce and talent:** Although the company noted that it is enjoying record-low attrition, it added that there is a very limited supply of AI-native talent in the marketplace. EPAM isocused on internal training and upskilling its existing engineering workforce to align with what it described as aast evolving environment.
- **Financials.** EPAM continues to expect to deliver healthy gross margin trends in 2H driven by tailwinds from pricing and utilization despite the impact of near-term revenue headwinds. Management expects the company's non-GAAP operating margin to remain within the 15%-16% rangeor FY27, and added that it still sees roomor non-T&M profitability to improve. On capital allocation, the company said it would remain biased towards share repurchases over M&A goingorward.

Valuation/Risks

Qnity (Buy): Our 12-month price target is $175, which is based on a 32X P/E multiple applied to our normalized EPS of $5.50. Key downside risks: (1) slowdown in waer starts across any of the end-markets the company serves (i.e., DRAM, NAND,oundry/logic etc.); (2) incrementally punitive tariffs and export restrictions; (3) additional contingent liabilities stemming from PFAS litigation.

Nvidia (Buy): Our 12-month price target is $300, which is based on a 30X P/E multiple applied to our normalized EPS estimate of $10.00. Key downside risks include: (1) slowdown in AI infrastructure spending, (2) share erosion due to increased competitive intensity, (3) margin erosion due to increased competition; (4) supply constraints.

Lam Research (Buy): Our 12-month price target is $380, which is based on a 35X

multiple applied to our normalized EPS forecast of $10.75. Key downside risks: (1) pause in upgrade spending from the NAND suppliers; (2) incrementally punitive export restrictions released by the US government; (3) marked shift in the industry's need for lithography (increase in intensity) vis-a-vis deposition/etch applications.

Seagate (Buy): Our 12-month price target is $960, which is based on a 24X P/E multiple applied to our normalized EPS estimate of $40.00. Key downside risks: (1) difficulties qualifying HAMR at the major hyperscalers; (2) lack of supply-side prudence from Seagate or the broader industry.

Credo (Buy): Our 12-month price target is $285, which is based on 27X NTM P/E applied to our Q5-Q8 EPS estimate of $10.75. Key downside risks: (1) faster than expected adoption of optical solutions at the expense of copper; (2) increased competition in AECs; (3) lumpiness in revenues due to customer concentration.

EPAM (Neutral): Our 12-month price target is $100, which is based on 7X our one-year forward earnings estimates. Upside risks: (1) earlier-than-expected recovery in discretionary IT spending, (2) increased demand for AI-related projects, (3) stronger-than-expected deal conversion. Downside risks: (1) further demand slowdown, (2) dilutive M&A, (3) increased geopolitical tensions.

Disclosure Appendix

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Rating and pricing information

Credo Technology Group (Buy, $160.31), EPAM Systems Inc. (Neutral, $114.52), Lam Research Corp. (Buy, $298.01), Nvidia Corp. (Buy, $218.36), Qnity (Buy, $123.32) and Seagate Technology (Buy, $862.33)

The rating(s) for Credo Technology Group, EPAM Systems Inc., Lam Research Corp., Nvidia Corp., Qnity and Seagate Technology is/are relative to the other companies in its/their coverage universe: ARM Holdings, Accenture Plc, Advanced Micro Devices Inc., Amkor Technology Inc., Analog Devices Inc., Applied Materials Inc., Broadcom Inc., Cadence Design Systems Inc., Camtek, Cognizant Technology Solutions, Credo Technology Group, EPAM Systems Inc., Entegris Inc., GlobalFoundries Inc., Globant SA, Intel Corp., International Business Machines Corp., KLA Corp., Lam Research Corp., MKS Instruments Inc., Marvell Technology Inc., Microchip Technology Inc., Micron Technology Inc., NXP Semiconductors NV, Nvidia Corp., ON Semiconductor Corp., Onto Innovation, Qnity, Qualcomm Inc., SanDisk Corp., Seagate Technology, SiTime Corp., Synopsys Inc., TaskUs Inc., Teradyne Inc., Texas Instruments Inc., Western Digital Corp.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: https://www.goldmansachs.com/worldwide/india/research-analyst. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in

exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
