Asia Leaders Conference 2026
Aug 31-Sep 2, 2026
Explore >

Bottom line: We hosted iQIYI CFO and IR team on Sep 2 at our GS Asia Leaders Conference 2026 in Hong Kong. Management discussion and investor focus are centered around: 1) Nadou Pro's progress and role in content production; 2) AI-enabled transformation of content; 3) Mid-length dramas as a capital-light growth format; 4) Financial performance including subscription recovery, cost discipline and profitability.

We summarize our key takeaways within.

AI transition and Nadou Pro

- **Nadou Pro** is at SaaS layer built on third-party models (eg. Kling, Seedance and HappyHorse, etc.), with **credit-based pricing** covering tokens, cloud computing and others. Creators can use it for commercial projects and upload content materials/templates for revenue sharing. More importantly, company aims to leverage the tool to **lower its content costs** and **shorten production cycles** for long- and mid-length dramas.
- Traditional drama producers are increasingly shifting toward mid-length dramas and selectively using AI in long-form productions. AI can replace natural scenery and certain sci-fi, fantasy and costume drama settings, but is less suitable for performance-intensive genres or productions centered on top celebrities.
- Management highlighted 2 online films from the three-part **AI-generated *The Ferry Man: The Dream of Floating Life Series*** (灵魂摆渡：浮生梦系列) generated subscription revenue and recouped their investment within 5 days upon release. Comparing with different online-movie benchmarks, this film series' production costs and time were meaningfully lower while revenue reached higher level, demonstrating **tangible subscription revenue and commercial viability**.

Mid-length dramas

- Mid-length dramas typically comprise **20-30 horizontal-format episodes of 15-20 minutes** per episode, fitting LFV users' viewing habits while benefiting

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. from **faster production and approval to release**. Titles including *Sin in The Winter* (凛冬下的罪恶) and *The VI Group of Fatal Case* (重案六组) have delivered encouraging results, and IQ now takes up c. **50% market share in mid-length dramas**, ahead of peers and ranking first.

- Mid-length dramas use the **capital-light revenue-sharing model**: creators bear production costs, while IQ deducts bandwidth, channel and other operating costs from subscription and advertising revenue before distributing profits to creators. This model protects IQ from losses, while its competitive revenue-sharing terms helps attract creators and faster approvals alongside better traffic provides more advertising monetization opportunities.

Financial performance

- Management targets **subscription revenue to gradually resume positive yoy growth in 2027**, as most user migration to Douyin and Hongguo has occurred. Company's focus is now on improving premium long-form supply and production speed, while encouraging producers to create more economically attractive mid-length dramas.
- For **cost saving/efficiency**, company will use AI more extensively where substitution is practical, avoid replacing content requiring strong live performances, and reject lower-quality self-produced projects before filming. Investments with visible profit potential will continue, while projects without clear returns will be delayed or suspended. Management expects **non-GAAP OP to turn positive in 3Q26**.

Price Target Risks and Methodology - iQIYI Inc.
Valuation methodology: We are **Neutral** rated on iQIYI with a 12-month P/E-based target price of **US$1.4** based on a 12x 2027E P/E multiple.

Key upside/downside risks: 1) Softened/Intensified competition/execution risk; 2) Better/Weaker ROI on content cost; 3) Regulatory risks; and 4) Better ability/Inability to retain and attract new advertisers.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this

company.

It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites.
