Oracle was down 2% on 9/11 post its 1QFY (August) report. Revenue was 1% above the Street; IaaS was 3% above (+121% yoy) and SaaS -1% below (+10% yoy, VisibleAlpha). Oracle updated FY27 guidance to $90bn+ (from $90bn) of revenue and maintained capex guidance of $90-95bn (or $70bn adjusted for customer prepayments).

We believe the quarter largely provided clarity on near-term debates: Oracle is showing evidence of backlog conversion translating into revenue, with OCI growth accelerating to 121% (93% in 4Q) as incremental capacity comes online, alongside delivery of 850MW in the quarter. The company also removed a key financing overhang by completing the $20bn ATM and highlighted that most incremental RPO is being funded through prepayments, supplier financing, and BYOC structures. In our view, the larger debate remains FY28 and beyond as investors look to gain visibility into the magnitude of FY28 capex, future funding requirements, and when the company returns to consolidated positive FCF. We believe the key for the stock from here will be Oracle's ability to stay on pace with its capacity ramp while demonstrating that incremental supply is translating into RPO conversion, revenue, and ultimately gross profit growth. Investor focus now shifts to Oracle's October Investor Day, where we look for greater visibility into backlog conversion, capacity deployment, the magnitude of FY28 capital requirements, and potential upside to the revenue outlook given continued growth in RPO.

Key takeaways:

- **OCI capacity ramp remains on track, with a diversified buildout reducing data center execution risk.** Oracle delivered 850MW of AI capacity and 300k+ GPUs in the quarter, including 131k GPUs at Abilene alone. Six of eight Abilene buildings, representing 618MW and 75% of campus capacity, have now

been delivered; customer acceptance times have compressed to 24 hours, and GPU utilization remained high at ~98%. Shackleford remains the next gigawatt scale campus. On New Mexico and Wisconsin, management emphasized both projects remain on track from a data center construction perspective, with permitting and power related processes progressing as expected; though Oracle noted that neither site is required to achieve FY27 guidance, given capacity growth is diversified across numerous campuses globally and delivery occurs in phases rather than all at once. Management also highlighted extensive contingency planning, backup options, and schedule buffers across its deployment roadmap.

- **Capital intensity remains elevated but funding mechanics shifting.** While RPO reached $664B, up 46% yoy, the vast majority driven by prepay/BYOC contract structures that do not require incremental capital from Oracle. Management expects around half of its RPO to convert into sales over the next 36 months (~$330bn, or 80% coverage vs. Oracle's previously disclosed revenue targets). Oracle also completed its previously announced $20bn ATM equity issuance during the quarter, removing a financing overhang as the company scales infrastructure investment. Management reiterated that FY27/FY28 remain peak capex years and maintained FY27 capex guidance of $90bn to $95bn ($70bn outlay adjusted for customer preapayments.)
- **Underlying contract economics:** GPU capacity coming up for renewal in the quarter was either renewed or resold at approximately 20% higher pricing than prior contracts, despite the majority of those GPUs being more than four years old. While management did not provide a time-frame for returning to consolidated free cash flow positive status, it noted that individual projects become strongly free cash flow generative shortly after ramp, with project level FCF conversion ~100% of post tax EBITDA.
- **Growth in SaaS and database.** Multi cloud database revenue grew 353% while multi cloud customers increased 180%, supported by Oracle's expansion to 70 multi cloud database regions and 119 availability zones across AWS and Azure. On the software side, SaaS revenue grew 10%, with Fusion growing 14% and industry applications growing >20%. Management continues to position AI as an accelerator for application adoption, highlighting strong traction in embedded AI, agent deployments, AI assisted implementations, and the emerging AI Data Platform opportunity.

Valuation and Key Risks

We maintain our Buy rating. We raise our 12-month price target to $240 (from $239), based on 15x (from 18x on increased capital intensity) Oracle's 2030E adjusted net income, discounted back to SNTM (Q5-Q8) to be consistent with our broader coverage framework. We adjust our FY27/28/29 EPS to $8.07/$10.27/$15.59 from $7.72/$10.84/$15.07.

Key risks include customer concentration risk, timing and execution of the data center build-outs, intense capex investment cycle, and accelerating share losses in the database/SaaS market.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment contextor a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. Theour key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranksor specific metricsor each stock. The normalized ranksor the metrics are then averaged and converted into percentilesor the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is asollows:

Growth is based on a stock'sorward-looking sales growth, EBITDA growth and EPS growth (or financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock'sorward-looking ROE, ROCE and CROCI (or financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock'sorward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (or financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analystorecasts at the fiscal year-end at least three quarters in theuture. Growth uses inputs or the fiscal year at least seven quarters in theuture compared with the year at least three quarters in theuture (on a per-share basisor all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitativeactors and quantitativeactors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and thereore does not actor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or

policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
