China BEST Conference 2026 Takeaways

We met with several AI-related non-covered and private software players in our China BEST conference. The takeaways have good implications for the overall China software space.

Key Takeaways

- Ready for use data is critical for enterprise AI adoption, and data accumulation is essential for software incumbents in the AI era.
- There is big potential for software players at the harness part of the agent, especially for productivity tools.
- Workflow data and ecosystems could become the more durable application-layer moat.

Xunce (3317.HK, not covered), a data infra solution provider, observed fast rising demand from enterprises on data governance and data analytics platform. This is the first step or premise for enterprise level AI adoption. Xunce is leveraging on its full chain data capabilities serving asset managers and replicates to multiple sectors, especially power, telecom and manufacturing. It is taking the technology revolution opportunity to transform the business model from project based to consumption based model. In addition, customers are requesting software solution providers to solve the underlying computing related demand, suggesting higher popularity of software + hardware integrated solution.

ManyCore (0068.HK, NC) has a legacy design SaaS business suffering from the property sector downcycle and is focusing its R&D on new initiatives in the spatial intelligence area. It launched space understanding and generation AI models. ManyCore is exploring the world AI model through the 3D space model approach. This area is not very crowded as 3D spacial data are scarce, but ManyCore accumulated rich high quality data from its legacy business. It sees the commercial potential for such models in game development, video generation and AI hardware (like 3D scanner). *(Continued)*

Vertical AI agent start-ups takeaways: Evoken (design agent, private) and Rabyte (finance agent, private)

- Targeting high-value professional workflows. Evoken focuses on professional creative production while Rabyte targets institutional investment research; in both cases, the product aims to automate multi-step workflows rather than simply generate content or answers. This suggests monetization may ultimately be benchmarked against the time and cost of legacy professional processes rather than model inference costs, supporting potentially attractive economics for vertical agents that can establish deep workflow integration.
- Evolving from model wrappers into integrated workflow + data + model stacks. Despite targeting very different verticals, both Evoken and Rabyte see foundation models as only one component of the product, with differentiation increasingly coming from domain-specific workflows, proprietary data and granular control. Both are also training their own models—not necessarily to compete with frontier labs on SOTA performance, but to improve domain performance and lower inference costs. We think this points to increasing convergence between scaled agent and model companies, with vertical players selectively internalizing the model layer as usage and proprietary data accumulate.
- Workflow data and ecosystems could become the more durable application-layer moat. Both companies emphasize capturing user interaction/workflow data and building ecosystems of reusable skills, workflows and assets, and share the revenue/token with creators in ecosystem as incentives. This creates a potential flywheel where greater usage generates proprietary data, improves models and product features, and expands the library of reusable capabilities—raising switching costs and strengthening network effects.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of August 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.
For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
Stock Rating Category	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1555	42%	450	48%	29%	767	44%
