On September 17, we hosted Dr. Ding Zuyu (丁祖昱) as the third speaker for our China Property Expert Call series in 2026 (see the first/second). Dr. Ding is the Founder and Chairman of Shanghai Purui Digital Intelligence Technology Co., Ltd. (a cutting-edge property technology and data intelligence enterprise) and Dean of the Shanghai E-House Real Estate Research Institute.

Key takeaways:

For the property market, Dr. Ding expects **1)** market supply to remain balanced in the near term as developers rush for construction/presale permits before Aug 28, but a significant 12–18 month supply shortage is projected from Mar 2027 as a result of sales model reform, before potentially stabilizing two years later; **2)** demand to sustain momentum throughout the coming 4Q sales season, leading to a yoy rebound in primary sales and heightened secondary market activity, despite a wait-and-see stance among some buyers for now; furthermore, upon entering next year's anticipated supply vacuum, secondary market supply will likely partially offset primary shortfalls; **3)** longer term, he anticipates 2030 as the year for market stabilization on both price and volume, which might also be a better timing for the government to roll out property tax, in his view.

For developers, **1)** business models need to be adjusted to realign with prolonged cash flow cycles and forward selling price uncertainties, including shifting focus from the presale stage to completions - with timelines for buildings under 18/11 floors being shortened to c.18/12 months - while front-loading market study over marketing strategies; **2)** large-scale developers and financially strained POE developers that are still relatively active in the land market during the past two years will face the most pressure in the near-term, forcing the former to downsize operational scales (potentially lower their 15th five-year sales target by 20-30%) and the latter to either partner with SOEs or exit the sector due to state-biased bank financing; and **3)** mid-tier SOE and strong local developers will emerge as beneficiaries, with mid-tier SOEs gaining a relative advantage amid reduced competition from large SOEs and local players likely establishing dominance with over 20% market share in lower-tier cities, according to the expert.

For local governments, Dr. Ding projects **1)** short-term land sales will contract sharply, particularly in lower-tier cities, before stabilizing around March 2027. **2)**

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

本报告来源于“慧博投研”，请勿外传!

Local policy countermeasures will remain relatively limited due to strict execution from banks so far. He cited Wuhan's execution details might serve as a good example for rest of the other cities, which includes land premium installments, unit-by-unit completion inspections, or defining housing "completion" at rough-house stage instead of after being fully furnished, so that developers' cash conversion cycle can be shortened. Furthermore, **3)** the divergence between top-tier and lower-tier cities will widen as the former will easily regain attraction if land price moderates by 10-20%; while lower-tier cities are likely to face heightened fiscal pressure as LGFV land purchase is unlikely to be sustained.

Key takeaways

According to Dr. Ding, the 828 New Policy represents a systemic institutional reform, deliberated for approximately three years, which signifies a fundamental shift to new real estate development models from the old paradigm, with the Evergrande verdict on August 21 effectively marking the conclusion of the latter. Dr. Ding summarized the major impacts as three aspects:

1. Impact on Property Market

On supply side: **1) In the short term** (current to pre-2027 Chinese New Year), Dr. Ding does not expect a sharp decline in market supply. On the contrary, a temporary, slight increase may occur as developers rushed to secure pre-sale permits before August 28, leading to a largely balanced supply-demand environment. **2) In the mid term** (Mar 2027 to Sep 2028), Dr. Ding projects a notable supply shortage, lasting 12-18 months, primarily due to new land projects now requiring topping-out to pre-sale or being sold as completed homes. Furthermore, developers are no longer incentivized to expedite construction solely for pre-sale permits as presale funds will be locked in escrow account and mortgages will not be disbursed until completion, which will create a significant gap in new salable inventory. **3) In the long run** (beyond two years), Dr. Ding expects supply to gradually adapt to the new rhythm and stabilize.

On demand side: **1) Entering 4Q26**, Dr. Ding expects a stable primary market (despite a more active secondary market), demonstrating a significant year-on-year increase, with the traditional “Golden September, Silver October” sales season still evident. Nevertheless, there may also be some prospective buyers adopting a wait-and-see stance, as completed homes could reduce delivery risk and offer benefits of deferred repayments. **2) In the mid term**, during the anticipated new home supply vacuum, Dr. Ding expects secondary transactions to pick up, partially offsetting primary declines, while whether it could fully compensate the shortfall remains uncertain.

For property tax: Dr. Ding regards the introduction of property tax before 2030 as **largely unlikely** based on the current context, because such measure can only be considered once the property market stabilizes and recovers to a healthy stage, such as property FAI growth (below -20% currently) and primary sales growth (below -10% currently) returning to c.0% yoy, as well as a stable secondary market and ASP trajectory.

2. Impact on Developers

Development model restructuring: **1)** With cash flow cycles inevitably prolonged, Dr. Ding projects developers to revise down their investment and sales targets during the 15th Five-Year Plans period by 20-30%. **2)** Dr. Ding also expects developers’ focus to shift from rushing for presale to rushing for completion, with completion of buildings of 18/11 floors and below could be compressed to c.18/12 months. **3)** Besides, the marketing function will be de-emphasized and post-positioned in the development process, while the importance of market study and product development will be significantly elevated and front-loaded.

Players under most pressure would be **1) large-scale developers**, as they will experience the most significant cash flow pressure, necessitating a further reduction in their

本报告来源于“慧博投研”，请勿外传!

operational scale to a more sustainable level, and **2) POE developers with financing difficulties**, as the lead bank mechanism continues to favor SOEs over POE players, making it hard to secure loans solely through project-based management, thus they may exit the sector if they fail to establish partnerships with SOE players to secure developer loans, according to Dr. Ding.

Beneficiaries would be **1) mid-tier SOE developers**, characterized by their moderate scale and state-owned backing, which historically did not prioritize aggressive expansion, are now poised to gain a relative advantage. This is particularly true in a competitive environment where large SOEs are moderating land acquisitions and weak POE developers are exiting the market; **2) strong local developers:** in lower-tier cities, local developers demonstrating robust development capabilities are likely to establish regional dominance, potentially achieving market shares exceeding 20%, per Dr. Ding.

Resolution of existing legacy inventory: Dr. Ding regards non-market-based approaches such as government buybacks as unfeasible due to fiscal constraints. Consequently, the resolution of existing legacy inventory can only proceed slowly over a period of 5-20 years.

3. Impact on Local Governments and the Land Market

For the land market: Dr. Ding expects land sales to contract sharply in the short term, especially for lower-tier cities, before stabilizing around Mar 2027.

Limited scope for local policy countermeasures: As bank execution has been strict so far, including closed-loop fund management and disbursement upon project completion, Dr. Ding sees limited scope for local policy countermeasures. He cited Wuhan's execution details might serve as a good example for the rest of the other cities, which includes land premium installments, unit-by-unit completion inspections, or defining housing "completion" at rough-house stage instead of after being fully furnished, so that developers' cash conversion cycle can be shortened.

Widening divergence between top-tier and lower-tier cities: Dr. Ding expects **1) top-tier cities** to easily regain attraction if land price moderates by 10-20% (from 20%+ for BJ/SH currently), while **2) lower-tier cities** may face more fiscal pressure as LGFV land purchase is unlikely to be sustainable.

Reg AC

We, Yi Wang, CFA, Shi Xu and Zihan Wang, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Contributing Authors: Yi Wang, CFA Goldman Sachs (China) Securities Company Limited, Shi Xu Goldman Sachs (China) Securities Company Limited, Zihan Wang Goldman Sachs (China) Securities Company Limited.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	50%	34%	16%	65%	59%	43%

As of July 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,104 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither “registered banks” nor “deposit takers” (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for “wholesale clients” (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom’s departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or

本报告来源于“慧博投研”，请勿外传!

policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

本报告来源于“慧博投研”，请勿外传!

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
