We hosted an expert call on China Auto policies implementation on Oct 15, where the expert shared views and insights regarding **1)** Potential EU safeguard measures for hybrids, **2)** export tax rebate reductions signalling domestic government policy shift, **3)** expectation of emerging regulatory risks and industry consolidation, **4)** while remaining positive on 2027 volumes (the expert expects 2%-3% yoy retail growth and 20% yoy export growth).

**Key takeaways:**

- **EU safeguard measures likely for hybrids:** The expert expects the EU to likely impose four-year safeguard measures on hybrid vehicles rather than anti-dumping duties for five-year horizon, consistent with recent media reports. This mechanism mirrors recent precedents such as China's beef import safeguards and US washing machine tariffs, aiming to cap Chinese hybrid volumes at approximately 300k-400k units annually (or 350k per Bloomberg). Meanwhile, the expert highlighted that the Chinese government did not intervene much in the allocation process in the case of 49k units quota in Canada, leaving it to automakers, Canadian dealers and policymakers. However, the expert expects the Chinese government could be more involved in the allocation of the EU hybrid vehicle quota.
- **Export tax rebate reductions signal domestic government policy shift:** Per the expert, China is progressively scaling back export tax rebates for "new three" products (i.e. EVs, batteries and solar), with battery rebates declining from 13% to 0% between 2024-2027 (13% before Dec 2024, 9% from Dec 2024 to Mar 2026, 6% from Apr 2026 to Dec 2026, 0% starting from Jan 2027). According to the expert, this move likely reflects domestic fiscal pressures and intent to curb excessive overseas subsidization amid intense domestic competition. Per the expert, the financial impact is likely around 4% of FOB (free-on-board) value loss for exporters. Also, the expert highlighted that the potential inclusion of ICEs at reduced rates needs to be watched.
- **Emerging regulatory risks:** The expert still sees emerging regulatory risks both in China and overseas. **1) Domestically,** consumption tax reforms may shift taxation from production-end to consumption-end and introduce higher charging price from public charging stations or mileage-based tax on BEVs to replace fuel taxes, though legislative hurdles remain. **2) Additional overseas**

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

**headwinds** include the EU's upcoming Industrial Acceleration Act (IAA), cyber-security regulations, and relevant regulation on forced labor potentially starting from 2027.

- **Industry consolidation outlook:** Given emerging regulatory risks, the expert anticipates industry consolidation domestically going forward. The expert expects industry consolidation into 7-10 major groups during the 15th Five-Year Plan, likely in 2029-30.
- **Localized production faces dual oversight constraints:** On the one hand, localized production could bypass potential hybrids cap, while on the other hand, European localization efforts are constrained by both EU requirements (e.g. 70% local content excluding battery, equity/tech transfer mandates under IAA) and Chinese government also keeping an eye on overseas investment, per the expert. Pure KD assembly cannot meet EU localization thresholds, therefore, the expert expects gradual expansion of China's automotive supply chain overseas as well.
- **Potential market share ceiling overseas:** The expert sees Chinese brands' European market share faces an implicit ceiling, compared to Japanese OEMs at a stable share of 11-13%. The expert expects Chinese OEMs to exceed Japanese market share in the long run, while still sees challenges in China OEMs reaching 20% market share.
- **Expects domestic rebound in 2027E:** The expert still expects **2-3% retail growth in 2027**, supported by continued trade-in subsidies (likely extended through 2027) and favorable NEV purchase tax rates (5% in 2026-27 vs. 10% in 2028), making 2027 an optimal buying window. Meanwhile, the expert expects **export growth of around 20% in 2027**. Despite rebate cuts, the expert expects structural export momentum would persist driven by global electrification demand and diversified market access strategies.

## GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

## M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

## Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that

has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
