We hosted 4 meetings with companies in the Taiwan PCB/CCL/Substrate supply chain during the annual Taiwan PCB show (TPCA show) in Taipei on Oct 21, 2026, and visited more than 10 companies in the supply chain to see the current state of the PCB/CCL/Substrate industries. Our key takeaways as below:

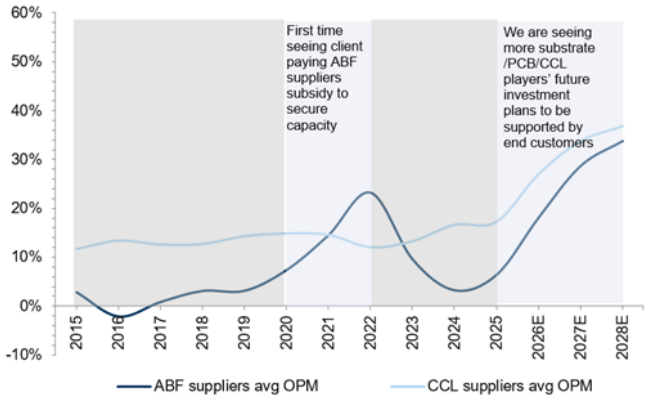

End demand remains solid into LT with customers' LTAs/subsidies/investments into new capacity for 2027-30

Despite some investors' concern on slower investment in the AI hardware supply chain in coming years, we continue to see a solid demand uptrend intact for all high-end PCB/CCL/Substrate and raw materials for their respective industries**. We are seeing more substrate/PCB/CCL material players' future investment plans (in 2027-30) supported by end customers (including via LTAs, subsidies on capacity expansion, prepayments and/or incentive fees), which we have not observed before (we see EMC, ZDT, Co-Tech and other high-end CCL companies being asked by their customers for LTAs/subsidies for dedicated capacity/plants; however, not all players are receptive to these arrangements)**, implying an even fiercer supply shortage condition in the coming years. We therefore anticipate a more favorable profitability outlook than we previously expected for the substrate and PCB/CCL/material suppliers in coming quarters/years (Exhibit 1), and we expect this (direct investment from end customers on the capacity) to strengthen investor confidence in the multi-year demand/pricing/profitability uptrend opportunity we see.

We expect this to benefit the bottom line as (1) depreciation should decrease with less equipment (Exhibit 2) and (2) profitability should increase as more pre-payment/subsidies are recognized. Also, for those companies that do not enter LTA/subsidy agreements, etc, with their customers, we believe they should find a better pricing outlook (like ABF substrate spot price players) in the long term, with more flexibility on selecting customers/projects. As a result, we view the structural changes in the supply chain positively and expect further valuation re-rating potential for PCB/CCL and material suppliers with additional capacity being booked by clients.

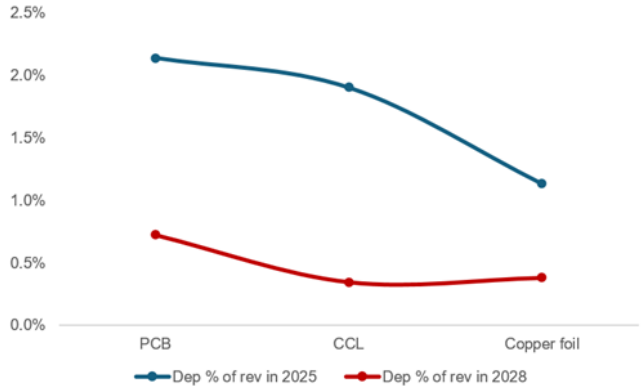

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

PCB CCL upgrading continues: M10 is under qualification, which should start shipments from 2H27, while we expect M11 shipments to start no later than 2030
For the PCB CCL industry overall, the key revenue/profit driver in our view is the solid specification upgrading trend (e.g., AI M7 ramp up in 2024, the M8 ramp in 2025, and M9 in 2026, Exhibit 3) which continues to drive high-end CCL players' ASP growth by 25-50% YoY annually in 2024-2026, and we are seeing the trend continuing and accelerating in coming years, despite the concerns of some investors in our conversations that a technology migration slowdown is impacting CCL players' revenue/profit growth opportunity.

During the TPCA show, we saw both EMC and TUC launch their M10/M11 solutions at the event, while both companies mentioned they are closely engaging with end customers for the next-generation AI R&D projects, based on the M10/11 solution (+ under qualification now). We believe **EMC should start shipping its M10 products from 2H27 at the earliest** for specific AI customer's GPU AI rack solutions and that shipments should ramp up significantly in 2028 as more GPU and ASIC AI projects start adopting this solution. **For TUC's M10 products, we believe the company will start shipment from 2028** for not only high-end 3.2T Ethernet switch projects but also for some ASIC projects.

Both EMC and TUC are currently under verification with clients for their M10/M11 grade CCL, which incorporates Q-glass. **In terms of the possibility of adopting PTFE-based CCL, the new solution continues to face production difficulties, making us less positive on the solution's progress, and we only expect the MP (mass production) time to occur after 2H28 at the earliest (our supply chain checks suggest the production yield for PTFE-based PCB is running at 10-15% vs. average yield of 80-90% for PCB with M9 grade CCL adopting Q-glass).** As a result, we believe the PCB upgrade for switch tray in Nvidia's Rubin Ultra GPU servers starting from 2H27 could have a high likelihood of adopting M9/M10 grade CCL with Q-glass/HC (Hydrocarbon) instead of PTFE, potentially implying better EMC/TUC share than we currently expect over the next 2-3 years).

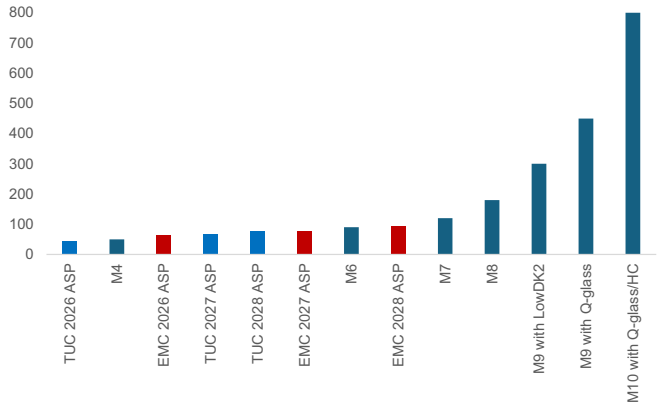

Exhibit 3: CCL/PCB upgrade pace is accelerating

Shaded area indicates the period of which each specific CCL grade is mainstream

New opportunity to enter the high ASP/GM ABF substrate supply chain for TW CCL supply chain players

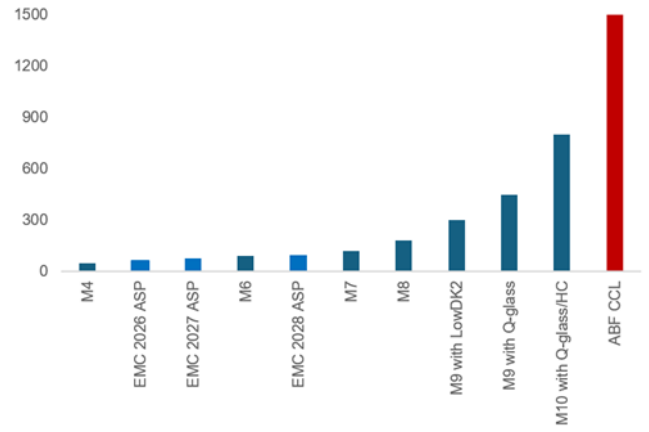

Given the relatively slow capacity investment to date from Japanese substrate material suppliers (ABF CCL/ T-glass/ micro thin copper foil etc.industries are mostly dominated by Japanese players, with more than 95% market share in the past 10+ years) while demand continues to trend up (we are seeing ABF substrates' material usage doubling every 1-2 years, due to the expanding substrate size/ increasing substrate layer counts / decreasing substrate production yield rate), **we started to see end customers qualification processes for Taiwan and mainland China ABF substrate supply chain vendors accelerate from 1H26, to better overcome supply constraints, implying a long term share gain trend from the Taiwan/mainland China new substrate material suppliers (including EMC and Co-Tech in our coverage space)**. We therefore believe **EMC likely starts taking ABF substrate CCL market share from 2H26** (TAM could be up from US$0.8bn-1.2bn in 2026 to US$2.0bn-2.5bn in 2027 and US$4.0bn-4.5bn in

2028, **accounting for ~15%/19%/22% of EMC's 2026/27/28E revenue**, per GSe, which not only suggests significant upside potential for EMC's ASP outlook (**ABF substrate CCL ASP per full sheet is ~US$1,500 vs. M7/8 only at US$130/180, Exhibit 5**) but should also lead to a solid GM uptrend. We estimate the **ABF substrate CCL GM is now at 50%+ which could further increase closer to the industry average of ~70%+ in the long term based on our industry checks (vs. our 2026/27/28 GM estimate on EMC is 35.2%/40.7%/43.4%)**. Also, we believe that micro-thin copper foil, which is dominated by Japan vendors, should also start to see some new suppliers starting from late 2027/early 2028, while Co-Tech said that it is preparing R&D resources and is working on designs for the new production lines for this new substrate-level product, which we estimate could start contributing to the company's revenue from 2H28 at the earliest per GSe.

Moreover, considering that the ABF substrate size/layer count both continue to increase, with less favorable yield rate and production efficiency, we expect the high-end AI ABF substrates consumption on ABF CCL to increase significantly. Based on prevailing specifications, we believe a quarter sheet of ABF CCL can currently produce ~6-8 units of high-end ABF substrates, but that number could decrease significantly to 2-3 units per quarter sheet in 2028 based on the substrate design, which should lead to a solid unit volume demand uptrend.

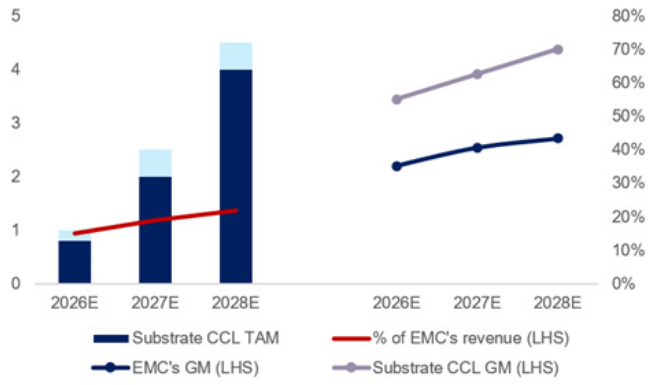

In terms of supply, EMC said that it could have 1.5mn sheets/month capacity by end of 2027 for ABF substrate CCL during TPCA event, which would then likely account for 50% of the global ABF substrate CCL capacity on our estimates, suggesting a strong focus by the company to compete in this high ASP/GM product segment.

Exhibit 5: High substrate CCL ASPs suggest solid upside potential for EMC's revenue/margin outlook
US$

Exhibit 6: ABF CCL TAM vs. EMC revenue; ABF CCL could be a long term growth driver with its higher GM
US$bn

Source: Goldman Sachs Global Investment Research

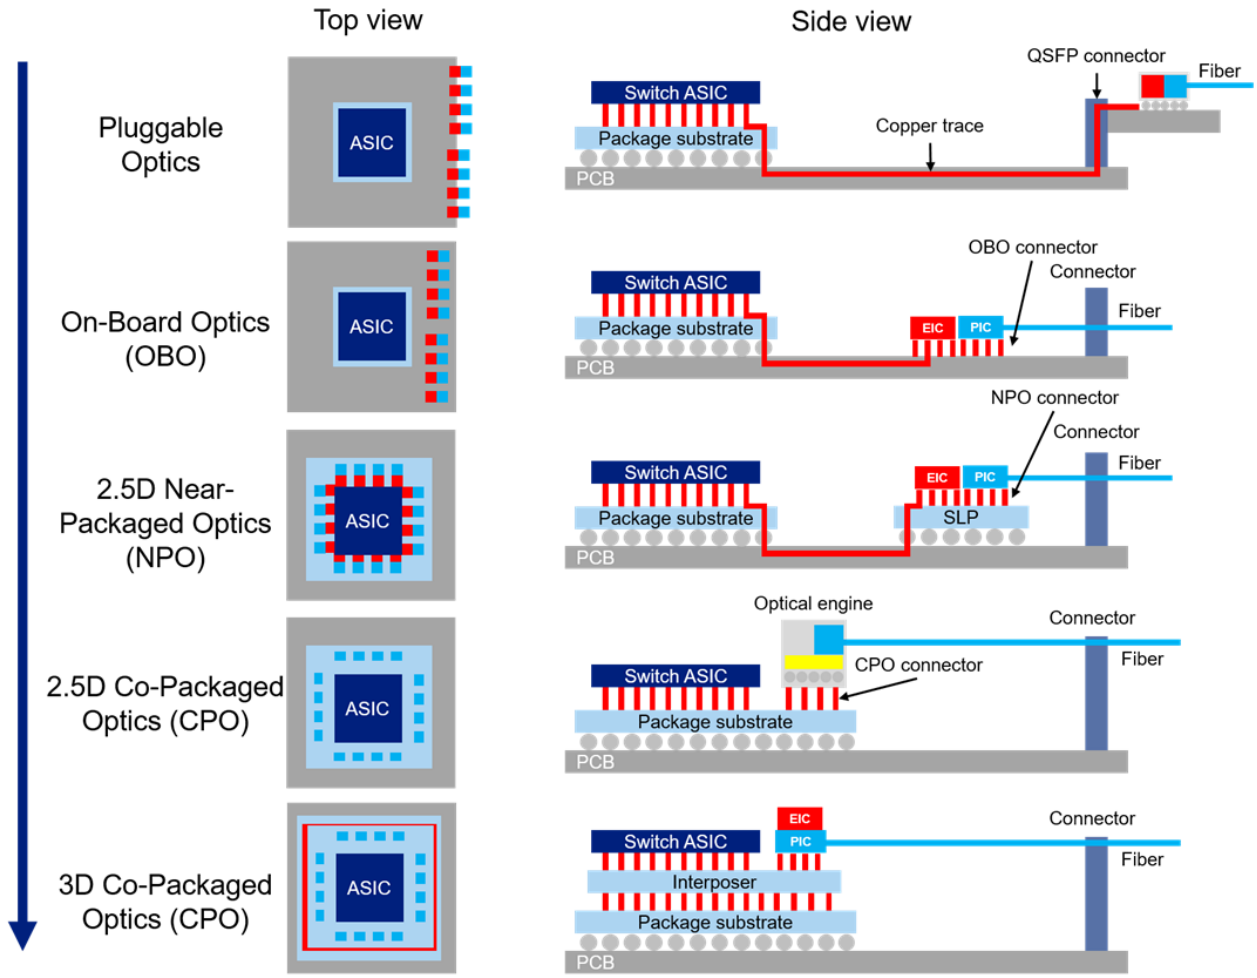

PCB/CCL upgrades to continue with limited risk from CPO adoption

We see limited near term risk of Co-Packaged Optics (CPO) adoption as the industry should start with switch trays in GPU servers from 2028E, when we estimate switch board to account for 14% of a total CCL TAM of US$48bn in 2028E. In considering an extreme case where all switch boards are downgraded to M4/M7 grade CCL, we would expect the impact to result in a <10% reduction in the 2028E CCL TAM, an impact which we believe would be manageable. At the TPCA show, we saw ZDT showcase its 30 layers

HDI PCB switch board, and the company said that it is confident that switch board will continue to see upgrades in terms of layer count and design complexity as optical transceivers are being used as the mainstream solution for scale out, which requires high end PCB/CCL for its longer electrical path comparing to CPO (Exhibit 7). ZDT mentioned the possibility of scale up adopting CPO, but is unsure on the MP timing at this point, and we see this technology as unlikely to be available before 2030E given its technology complexities.

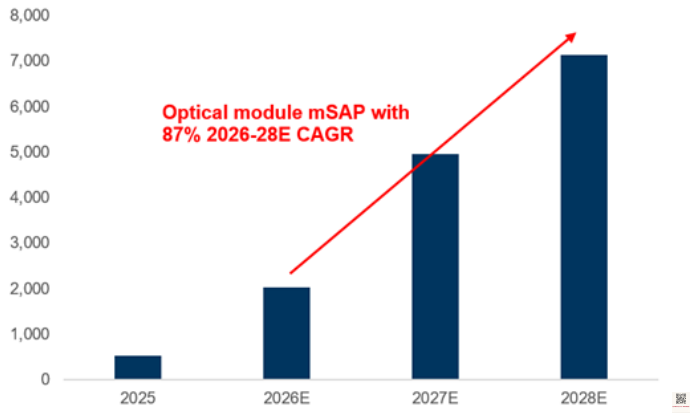

ZDT also showcased multiple optical module mSAP solutions, including 800G/1.6T/NPO/XPO, and we believe that optical transceivers, which rely on high end PCB/CCL in switch trays, will remain mainstream in the foreseeable future and thus is beneficial to the optical module mSAP suppliers (we expect optical module mSAP to see 87% 2026-28E CAGR, Exhibit 8). We believe ZDT is well-positioned to gain share in this fast growing market as we believe the company is proactively expanding mSAP capacity (we expect ZDT's mSAP capacity to reach 5x in the next 2 years, see here, as well as the company currently holds an industry-leading yield of 90%+ for its optical module mSAP products. Optical module mSAP GMs currently average 40%-45%, and could potentially reach 50%+ following pricing hikes and yield improvements, which would be beneficial to ZDT's profitability (our 2026/27/28 GM estimate on ZDT only at 24.7%/27.6%/31.4%).

Exhibit 7: Pluggable transceiver remains mainstream, the longer electrical path still relies heavily on high end PCB/CCL technology

Source: Company data

Exhibit 8: We expect optical module mSAP to register 87% 2026-28E CAGR

Investment view - Focus on new substrate/MSAP/M10 opportunity and market share

gainers

EMC to see solid upside on profit potential with the new substrate CCL opportunity

We continue to see EMC make progress in the new ABF substrate CCL business, a market which the company entered in early 2026 and started producing high-end ABF substrate CCL from 2H26, with monthly revenues reaching NT$150-200mn (<1% of the company's Sep monthly revenue) for the most high-end TPU substrate CCL market (see here). We believe EMC could become one of the market leaders within the next 3-5 years (we are expecting 20-30% market share in 2028E and trending up significantly afterward), given its track record of successfully entering new markets over the past two decades. Furthermore, the company is well-positioned to gain share in the tight supply market as the company is proactive with its substrate CCL expansion plans, and the company expects to expand its substrate CCL capacity to 4-5x of current level by 2027 (current substrate CCL capacity at 300k sheet/month), which should account for 50% of the global substrate CCL capacity by end of 2027E, implying a good opportunity for the company to further ramp up market share in the long term.

M10/11 upgrades still the key to earnings growth for EMC & TUC in the next 3+ years, while the favorable S/D outlook should continue to drive the like-for-like base pricing in coming quarters

We see EMC and TUC being well-positioned in the ongoing CCL upgrade trend as both companies are currently under verification with clients for their respective next generation M10/M11 grade CCL and are also future proofing their product-portfolios by continuing to develop PTFE-based CCL. For the new M10 grade CCL, we expect EMC will start shipments from 2Q27-3Q27 while TUC should start shipments from 2028, leading to meaningful upside potential for each company's revenue, as EMC/TUC's current ASPs have been approximately US$63/46 in 2026 while the M10 grade CCL ASP is currently priced at ~US$800 per sheet, implying substantial ASP upside potential from here, all else equal.

We continue to see a solid S/D outlook for high-end CCLs in coming years (see here) as capacity expansion for these CCLs continues to track slower than demand growth (see here). However, we note TUC revised up its capacity target and expects it to increase 2.5x+ over 2026-30 (8/5/30% upward revision to the year-end target capacity for 2026/27/28 from previous guidance), and based on company comments we believe the new capacity is fully booked by clients, implying a solid revenue/profit growth outlook.

Co-Tech is currently obtaining LTAs to secure high-end copper foil capacity, suggesting a solid long term market share and revenue outlook

We believe Co-Tech is well-positioned to benefit from the structural demand for high end copper foil in a shortage environment, as the company announced capacity expansion plans for a new Plant 4 in Malaysia, with capacity being secured by more than one client, per the company. The company now target its annual HVLP3+ effective capacity to reach 10K/20K/30K tons by end of 2027/28/29 (equivalent of 833/1666/2500 tons/month by 2027/28/29 end vs. current HVLP3+ effective capacity of ~250 tons/month). This should enable the company to achieve further gains in market share amid high end copper foil supply shortage environment (see here), as well as seeing a better pricing environment going forward.

We expect Co-Tech's new capacity, after ramp up, should continue to see 100% UTR, as

most of the new capacity has been booked/sponsored by end customers already, implying a solid market share and revenue outlook in coming years. Moreover, we believe the company will start to recognize customer subsidies from 2027 at the earliest, implying further incremental upside to profitability in coming years.

ZDT continues to maintain key one-stop shop status for all ABF/BT/HDI/HLC/mSAP products, suggesting solid market share outlook in long term

We remain positive on ZDT as the company continues to make progress with its optical module mSAP and AI PCB business, and the company mentioned that both of these business are seeing capacity bookings by clients. We believe ZDT will become a market share leader in the optical module mSAP industry (see here), as we expect the company to expand mSAP capacity by 5x over the next two years based on announced capex plans. Most suppliers in the optical module mSAP industry are proactively expanding capacity as CPO adoption risk remains limited.

Also, considering that ZDT is the only company that manufactures all types of ABF/BT/HDI/HLC/mSAP products, it is well positioned for further share gains not only in the optical transceiver market, but also in the AI PCB, ABF, BT markets. Additionally, we estimate that these new products will likely carry 35-50%+ GMs in 2027, implying a solid revenue/profit outlook for the company going forward.

We also see other companies within the CCL/IC substrate sector flagging supply tightness across the whole supply chain as industry expansion has not been sufficient to meet prevailing demand. This is in line with our view that suppliers with timely capacity expansion plans are better positioned to make further market share gains and benefit from stronger pricing/profitability amid a supply-constrained environment.

P&L

Investment Thesis - Elite Material

EMC, a key supplier of high-end HDI material (70%+ market share) and SLP material (90%+ market share), has been focusing on the high-speed switch/server CCL market for 3-5+ years. We are positive on its market share trajectory in the server industry and expect EMC to increase its share from <10% in the Purley generation to 15-20%/20+% in the Whitley/Eagle Stream platforms. EMC is also proactively expanding its share in the switch market (40%/30%+ in 2024/23 vs. <5% before 2019), with an expanding AI customer base (only one 400G customer in 3Q20, to being one of the largest suppliers in 2023), which should continue to benefit the company's top/bottom line growth over time. We believe EMC's leading position in the AI server CCL market should drive strong revenue growth and GM/OPM expansion in the long term, given that it is the major supplier for all Nvidia/Google/AWS AI server projects, and we expect it to maintain its leadership position. Considering its leading position in the high-end CCL industry, solid production skills and earnings growth outlook, we are Buy rated on the stock. With the shares trading at a 2026E P/E below AI server component suppliers and supported by a solid growth outlook, we view valuation as attractive.

Key downside risks include: (1) RCC to replace all high-end smartphone HDI design; (2) rising trade tensions, which could lead to weaker smartphone and server shipments; and (3) rising competition from mainland China peers.

Price Target Risks and Methodology - Elite Material

Valuation methodology: Our 12m TP of NT$10,200 is based on 27x 2H27-1H28E P/E (in line with the peak P/E multiple for AI component suppliers in the past 3 years).

Key downside risks: (1) RCC to replace all high-end smartphone HDI design; (2) rising trade tensions, which could lead to weaker smartphone and server shipments; and (3) rising competition from mainland China peers.

Investment Thesis - Taiwan Union Technology Corp.
TUC is a key high-end global CCL supplier that focuses on M7+ grade high-speed CCL (key applications include high-end switches (100G+) and AI server materials), with 20%+ market share in the past two years. The company continues to expect its unit market share in the server industry to increase from 15% in Whitley and Purley processors to higher in the Eagle Stream generation, and plans to launch two types of products for low-end and high-end customers (T2A and T2C) to gain market share. Also, strong growth in 400G/800G switch shipments and new 800G switch shipments, scheduled for launch in 2025-27, should continue to be a key demand driver for TUC, in our view. Additionally, the company is working on high-end AI projects with CSP and enterprise players, which we believe should drive revenue momentum in the long term. We view the stock as undervalued vs. Taiwan CCL peers on a P/E basis and rate it Buy.

Key downside risks include: (1) slower-than-expected share gains in the low-loss CCL segment; (2) rising trade tensions, which could lead to weaker server and switch shipments globally; and (3) rising competition from mainland China peers.

Price Target Risks and Methodology - Taiwan Union Technology Corp.
Valuation methodology: Our 12m TP of NT$3,010 is based on a 22x 2027E P/E (+2x STDV higher than the past 3-year industry average P/E multiple).

Key downside risks: (1) slower-than-expected share gains in the low-loss CCL segment; (2) rising trade tensions, which could lead to weaker server and switch shipments globally; and (3) rising competition from mainland China peers.

Investment Thesis - Co-Tech
Co-Tech is a global leading general server copper foil supplier, with ~60% market share in 2025 per GSe. We expect the company to enjoy solid share gain opportunities in the near term, considering its proactive HVLP capacity expansion plan and strong know-how in the advanced copper foil industry. Also, adoption of HVLP4 copper foil from AI servers and 1.6T networking switches starting in 2H26 should be a key demand driver for Co-Tech, in our view. Additionally, the company's proactive pricing strategy and ability to improve production yield should drive revenue momentum in the long term.

We are Buy rated as we believe Co-Tech will see better revenue/profitability in the long term given its shift to a more premium product mix along with proactive capacity plans (Plant 3 to be ready by end of 2027) and this should lead to strengthened valuations.

Valuation methodology: Our 12m TP of NT$940 is based on a 22x 2028E P/E, which is +1SD above the company's average upcycle valuation in the past 10-years.

Key downside risks: (1) earlier than expected CPO adoption in the computing IC, (2) slower than expected yield rate improvement speed, and (3) much stronger than expected capacity growth from HVLP peers, limiting pricing power

Investment Thesis - Zhen Ding Technology

Zhen Ding Technology (ZDT) is the global leading PCB supplier (top 1 in market share in sales) with 7-10% market share, and started its ABF substrate business from 2023 in Shenzhen, China; it has the highest ABF revenue exposure to the China market compared to all other ABF substrate suppliers. We believe ZDT will hold more than 40% ABF substrate market share in China by 2027E (up from 31% in 2024) and benefit the most from the strong and growing China ABF substrate market (53% 2025-27E CAGR) due to the increasing in-sourcing ratio for the AI computing ASIC/GPU market in China. We also expect the increasing foldable smartphone penetration rate in the long term to drive ZDT's FPC TAM, and account for 39% of the company's total revenue in 2027E. We see further revenue upside potential from foldable phones. We are Buy rated mainly due to our positive view on the company's China ABF substrate business opportunity, which should not only drive ZDT's revenue growth, but also improve its OPM level in the long term. We see upside for the stock price considering the company's solid growth opportunity, and our TP implied P/E multiple is still lower than the company's past 10+ year P/E average, which we believe is fair considering the potential upside from China ABF substrate market and increasing foldable phone penetration rate.

Valuation: Our 12-month TP of NT$1,025 is based on a SOTP valuation methodology, including (1) 3.5x blended 2028E P/B for ABF & BT substrate, (2) 20x 2028E P/E for high-growth AI server/switch related PCB (in line with industry average), and (3) 8x 2028E P/E for low-growth consumer electronics PCB (in line with industry downcycle average valuation).

Key downside risks include: (1) weaker-than-expected iPhone demand or slower content upgrade, (2) delay in new substrate capacity or slower-than-expected yield rate ramp up progress, and (3) fiercer competition in China ABF market.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman

Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: https://www.goldmansachs.com/worldwide/india/research-analyst. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
