Humanoid Robot and Physical AI

Tesla Optimus 3 read-throughs – deployment progress, technical bottlenecks, and stock implications

Tesla (covered by Rajat Gupta, N rating) held its 3Q 2026 earnings briefing this morning. While the market was watching a range of topics including FSD, capex, and core auto margins, our focus was on the latest updates for the Optimus humanoid robot. Elon Musk provided several important messages for the sector. He confirmed that Optimus production has started at Fremont, and signaled that Tesla could be ready to start shipping Optimus robots to other companies by the end of next year. While this is a more confident timeline than some had expected, Musk was clear that the ramp will be gradual, with volume guidance of 10k–20k units before launching external sales—below the most bullish market hopes. He described the manufacturing process as an S-curve, emphasizing that "10,000 things" need to work correctly and that the slowest component or process will set the pace for the entire ramp. Musk highlighted the robot's hand as the main hardware bottleneck, and achieving human-like dexterity, reliability, and onboard intelligence remains a challenge. Tesla's immediate focus is on deploying Optimus internally in its own factories for dangerous or repetitive tasks, with external commercial shipments targeted for late 2027. Consumer applications are further out. Musk also noted that a video demonstration of Optimus performing non-pre-scripted tasks is expected within the next one to two months, and that the integration of the next-generation AI5 chip in 2027 should provide a significant boost in compute power and enable more complex behaviors.

Our CIIF tour takeaways (see *Humanoid Robot & Physical AI: Robotics tour takeaways: CIIF 2026—Ecosystem demand, workflow integration, and what's next for the sector*) also support this more selective stance. The most tangible demand we observed was not at the robot OEM level, but among suppliers of sensors, 3D vision, data-collection devices, reducers, and dexterous hands. Leader Drive's management was notably concrete about Physical AI already contributing over 35% of its business, and it is planning multi-year capacity expansion. Orbbec highlighted a sharp ramp in robotics-related orders, especially for data-collection hardware and 3D vision modules. However, the demand is still "ecosystem demand"—R&D, pilots, and data collection—rather than mass end-user deployment. The gap between humanoid robot demos and industrial-grade automation remains wide, and the real bottlenecks are now around perception consistency, manipulation reliability, and the ability to deliver repeatable ROI in real-world workflows.

Our stock views: Against this backdrop, we have become more selective on the broader humanoid robot supply chain as expectations realign. The recent rally in Chinese robotics OEMs—led by Unitree and UBTech—has been sentiment-driven, and we remain cautious on these names in the near term as the market digests Tesla's more gradual production outlook. We see a risk of disappointment over the next 1–3 months as expectations reset and operational progress is reassessed, particularly for Unitree, Estun, and UBTech. At the same time, we continue to see Hengli Hydraulic and Sanhua Intelligent as the best-positioned Tesla bot supply chain plays, both confirmed suppliers that

See page 5 for analyst certification and important disclosures, including non-US analyst disclosures.

have not priced in much of the Tesla bot optimism and now trade at attractive P/E-based valuations after giving back most of their gains since 1H25. Both companies have solid underlying businesses and valuations near or below historical mid-cycle mean. Leader Drive remains our top pick among component names, given its proven moat, scalability, and more concrete Physical AI contribution, as reinforced by our CIIF meetings. Orbbec follows, with strong technology positioning in 3D vision and data-collection tooling, though we remain mindful of the near-term earnings risk. Our pecking order remains: Hengli Hydraulic = Sanhua Intelligent (both OW) > Leader Drive (OW) > Orbbec (OW) > Inovance (N) > UBTech (N) > Estun = Unitree (both UW).

Table 1: Key subsystems and development status of Tesla Optimus

Subsystem/Capability	Tesla Optimus (3Q 2026 update)	Status/Commentary	Bottleneck/Next Milestone
Hand (Dexterous hand)	Main hardware bottleneck	Musk highlighted the hand as the most difficult part, with human-like dexterity and reliability still a challenge	Improving hand design, durability, and tactile sensing; key gating item for industrial/consumer use
Eye (Vision/Perception)	Not specifically detailed	No explicit update on vision system, camera, or LiDAR; robust perception implied as necessary for non-pre-scripted tasks	Consistent, reliable perception for unstructured tasks; integration with "brain" and model
Chip (AI5)	AI5 chip integration targeted for April 2027	AI5 to provide c.10x compute vs. AI4; expected to enable more complex, generalizable behaviors	Hardware integration, software stack migration, and validation in real-world tasks
GPU/Compute	Not detailed	No explicit mention of GPU or compute bottlenecks, but AI5 is expected to be a major step up	Sufficient compute for real-time, non-pre-scripted task execution
Brain (Onboard intelligence)	Still in development	Musk emphasized need for further improvements in onboard intelligence and software to manage many degrees of freedom	Video demo of non-pre-scripted tasks expected in 1–2 months; ongoing closed-loop learning
Model (AI/Software)	Ongoing iteration	Focus on enabling Optimus to perform tasks that are not pre-programmed; software and model still evolving	Demonstration of generalizable, non-scripted behaviors; integration with new chip
Production plan	Gradual ramp, S-curve	Production started at Fremont; the initial output of 10k–20k units will be for Tesla Academy; slowest process/component sets the pace	Internal deployment in Tesla factories; external shipments targeted for end-2027
Supply chain	Reducing China reliance	Musk noted deliberate effort to localize and diversify supply chain, adding complexity to ramp	Localized sourcing, scaling non-China suppliers, and managing global logistics
Battery/Power	Not detailed	No direct update on battery tech, runtime, or energy density	Long-duration reliability and safe operation for industrial tasks
Factory deployment	Initial customers	Optimus to be used in industrial applications at first, such as dangerous repetitive tasks	Would be extended to household products as Tesla scales up

Source: Tesla 3Q26 briefing and public disclosures.

Read-throughs from Tesla 3Q26 briefing and Optimus update

- **Elon Musk's latest commentary on Optimus signals a more measured ramp-up, with the initial volume ramp-up guidance of 10k–20k units coming in below market expectations.** During Tesla's 3Q 2026 earnings call, Musk stated that while production has begun at Fremont, the company is taking a cautious approach to scaling. He guided to 10k–20k units within a 12-month timeframe, below prior market hopes, and described the manufacturing process as an S-curve, with "10,000 things" that need to work

correctly. The slowest component or process will set the pace for the entire ramp. Musk was explicit that the desire to reduce reliance on the Chinese supply chain is adding to the complexity.

- **Tesla's internal deployment strategy for Optimus is focused on self-play and training data generation, with external commercial shipments still at least a year away.** Musk explained that Tesla's immediate priority is to deploy Optimus robots for practical tasks, and Tesla is building an Optimus Academy where Optimus can do self-play and generate training data. As for the profile of initial customers, Tesla is considering industrial applications notably dangerous, repetitive, or ergonomically difficult tasks 24/7. This internal-first approach allows Tesla to collect proprietary real-world data, validate reliability, and iterate on both hardware and software before offering the robots to external customers. Musk stated that commercial shipments to outside companies are roughly a year away, and that broader consumer applications will follow only after reliability and cost targets are met.

- **Tesla's 3Q 2026 update highlighted the hand, onboard intelligence, and compute roadmap, while providing limited detail on reducers, vision, or battery.** Musk was explicit that the hand remains the main hardware bottleneck for Optimus, citing the challenge of achieving human-like dexterity, reliability, and long-duration operation. On the "brain" and software side, Musk emphasized the need for further improvements in onboard intelligence and the ability to manage the robot's many degrees of freedom, with the next major milestone being a video demonstration of Optimus performing non-pre-scripted tasks within the next one to two months. Tesla confirmed plans to integrate its next-generation AI5 chip into Optimus around April 2027, which management described as providing roughly an order of magnitude more compute than the current AI4 and enabling more complex, generalizable behaviors. However, there was no specific mention of vision systems, cameras, or battery technology, while Optimus Engineering Lead highlighted their relatively high confidence in body system. Musk did reiterate that the production ramp will be gradual, with the slowest component or process setting the pace, and that the company is deliberately reducing reliance on the Chinese supply chain, which adds to the complexity of scaling.

- **Musk's commentary reinforced that the path to mass adoption will be gradual, with initial customers likely to be industrial rather than residential.** Musk reiterated that the first external use cases for Optimus will be in industrial settings, where the robot can take on tasks that are dangerous or highly repetitive. He was clear that consumer applications are still further out, as the company needs to prove reliability, safety, and cost-effectiveness in more controlled environments first. Tesla's own regulatory filings also acknowledged that the company has not yet commercialized Bots and cannot predict demand from commercial or consumer applications, underscoring the early stage of the industry.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

J.P. Morgan Equity Research Ratings Distribution, as of October 03, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	35%	12%
IB clients**	83%	81%	72%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	93%	88%

*Please note that the percentages may not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:
A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other

derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
