## China Market-Wise | Asia Pacific

# What Happened? What Next?

Concerns over selling caused by trust tax, pressure on e-commerce, a weakening macro and elevated global market volatility has caused an acceleration of China's market correction. Historical valuation trough implies 10-15% further de-rating. Still favor A-shares on more signs of National Team effort.

**Persistent drawdown since Aug with acceleration lately:** The broad China equity market had experienced major and persistent draw-down since early August, with momentum accelerating since mid-October. YTD MSCI China, Hang Seng, and CSI300 have delivered -20.3% , -9.5% and -11.4% absolute returns so far, while performance for these indices since the start of Aug, and since Oct 8th, are -12.8%, -10.4%, -10.6%, and -5.7%, -2.5% and -4.8%, respectively. In fact Oct 22nd recorded the largest single day index price correction YTD for HSTECH, dropping by 5%.

**We had already turned more cautious on Sep 3 with price target cuts because...** (China Market-Wise: Cutting Index Targets amid Macro and Liquidity Headwinds [3 Sep 2026]) we saw the upcoming Fed hikes and tighter liquidity, a weaker macro, limited flow and positioning upside, as well as regulatory concerns around capital flow and investment in general, as the key risk points accumulating at the time across the broad HK/China equity space.

**Incrementally additional developments over the past two weeks have further exacerbated the negative momentum:**

- **Key reasons for the latest Hong Kong market drawdown -**

- Oct 22nd, the deadline for the tax payment based on the PRC individual income tax (IIT) on offshore trusts. The original announcement was made on July 24, 2026 by China's Ministry of Finance and State Taxation Administration (STA). The newly enforced regulations create a much more explicit tax framework for offshore trusts involving Chinese tax residents, taking effect immediately, with a 90-day window ending on October 22 for certain historical offshore-trust tax liabilities to be reported and paid without late-payment surcharges.

Even though we don't believe Oct 22's heavy selling was due to the urgency for subject entities/individuals to come up with cash for the tax settlement (any such selling would likely have been done much earlier on to meet the deadline), we do understand that the equity market overall may not be so familiar with the details of the development and the timeline sequence. Therefore, the market may have mistakenly thought this would trigger a round of panic selling.

*(Continued in next section, with detailed market drawdown reasons, further downside potential, and A vs. H preference and rationale.)*

# When could good value appear?

- The National Supervision Bureau summoned all major e-commerce players on Oct 21st and urged them to provide higher quality service and products, and to enhance/tighten their quality inspection mechanism. That triggered some concerns over potential pressure on margins for these players;

- The usual suspects - weakening domestic macro, uncertainty in the US and global market due to oil price, yield and inflation, and mid-term elections which could also impact Hong Kong meaningfully due the USD-HKD peg, and Hong Kong's unique nature of offering easier fund flow facilitation.

- **Key reasons for the latest A-share market drawdown -**

- Much stronger correlation between A-share market and the US market along the AI and capex super cycle investment themes. The A-share market has a much higher concentration of these segments (40%+ of CSI300), so the market tends to become more volatile if the US market becomes so;

- Extremely weak macro and consumption momentum. This is important as domestic investors, especially retail, still tend to trade by sentiment, on the "body-felt temperature" of macro activities. Therefore they can get nervous as macro data continues to weaken, despite the fact that the AI/Tech/Innovation sectors are doing much better with revenue and earnings growth (both ROE and earnings for CSI300 have gradually improved). Due to the weak macro, there is no place to rotate into if the AI/Tech narrative gets a bit challenged. This is different from the US market, where the S&P 500 may still be able to make a new high given much richer breadth and depth beyond the AI trade;

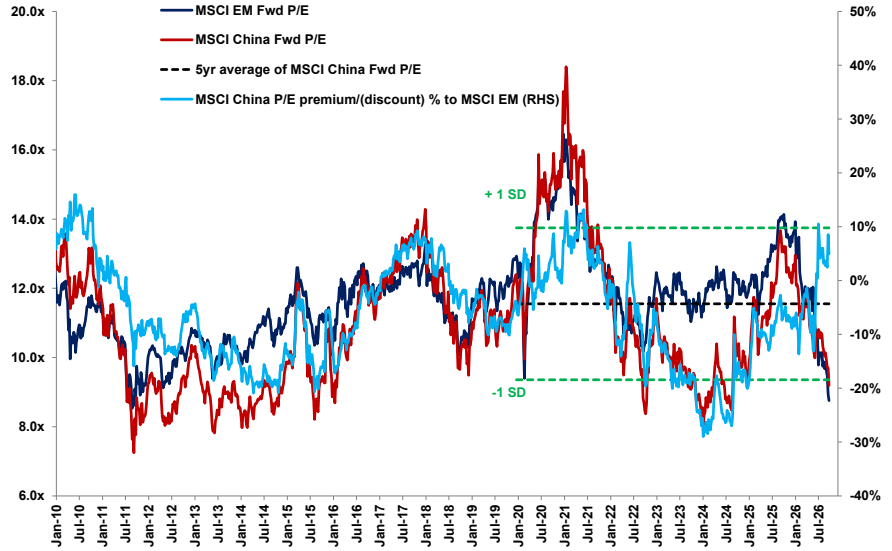

- Concerns about liquidity drying up due to upcoming mega IPOs, YMTC, etc.

## Historical valuation range suggests further downside before troughing

**For the offshore Hong Kong Hang Seng index and MSCI China -**

The historical valuation range suggests another ~10-15% drawdown before hitting the trough level around 8x 12-forward P/E (this happened in 2008, 2015, early 2020, Oct 2022, and summer 2024). As discussed earlier, the Hong Kong market would also be subject to global bond yield volatility and Fed policy path.

**Exhibit 1:** MSCI China Fwd P/E vs. MSCI EM Fwd P/E

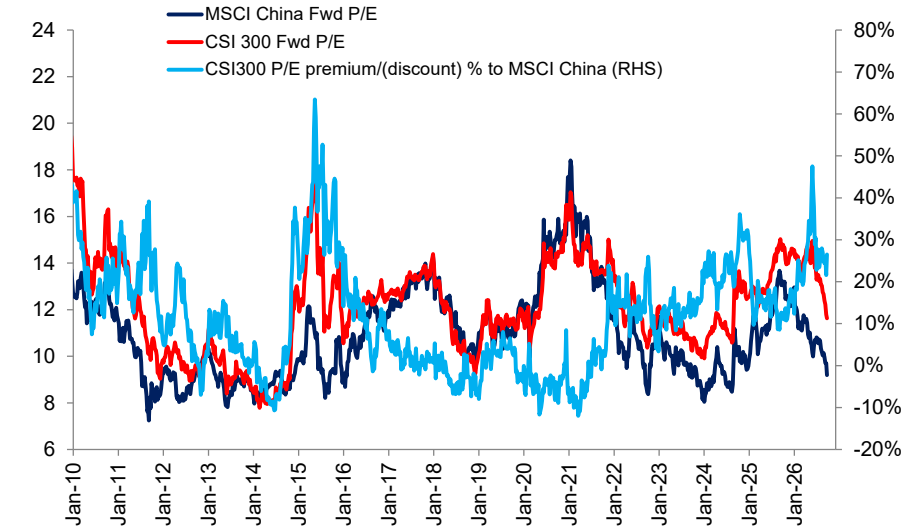

Source: Datastream, Morgan Stanley Research. Data as of Oct 22, 2026

**For the A-share market -**

A similar level of valuation de-rating has been experienced in the past for CSI300 before hitting its historical trough level at ~10-11x 12-month forward P/E (this had happened in late 2018, early 2020, late 2022, and 2024). We also believe it is more meaningful to monitor the National Team's actions and whether they change, as this could present an even stronger signal of near-term market stabilization. We provide a detailed discussion on this and the early signs of actions emerging in the next section.

**Exhibit 2:** CSI 300 Fwd P/E vs. MSCI China Fwd P/E

# Prefer A-shares on clearer National Team stabilization efforts

## Clearer signs of onshore stabilization efforts including National Team

**Stronger and clearer signal of Policy support finally appearing:** One key reason for us to maintain a long-standing preference for the A-share market over the offshore space has been the stabilization capability offered by the National Team, along with A-shares' bigger concentration in the higher revenue and earnings growth segments in AI related, hard-core technology and innovation companies.

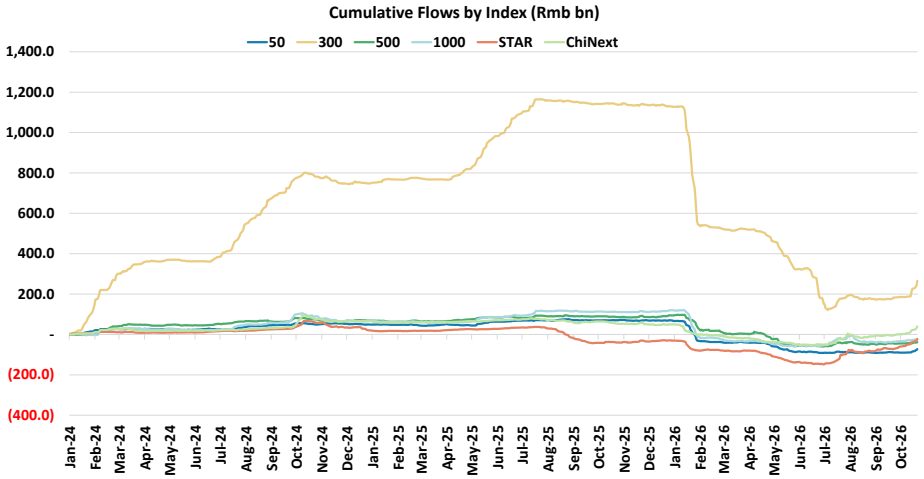

So for the A-share market, important to watch is when the National Team officially starts to buy in a high profile way. Based on historical experience, the market tends to trough and bottom out 1-2 months following high profile market purchases from the National Team, alongside open market communications from policy makers about commitment to stabilizing the equity market. We think that such actions are finally starting to appear in a meaningful and coordinated way, after an extensive period of National Team net selling since Jan 2026. We summarize them here:

1) According to Bloomberg Intelligence, National Team-backed money bough US$15bn between Oct 9 - Oct 20. This reported figure is quite consistent with the broad-based CSI300 ETF flows we track and use as a proxy for National Team buying ( Exhibit 4 ). What's worth noting even more is that the mix looks different from traditional stabilization episodes:

- CSI300: about 45% of estimated purchases versus ~60%-70% historically;
- STAR50 + ChiNext: ~37-50%, versus only ~7-17% historically.

That rotation is quite telling because the current drawdown has been concentrated in technology/growth. STAR50 had fallen nearly 40% from its peak amid the global AI/tech correction. Buying those ETFs rather than only heavyweight CSI300 ETFs looks more like a move to stabilize the epicentre of the selloff, rather than mechanically support the index.

**Exhibit 3:** Cumulative ETF flows of CSI 50/300/500/1000, STAR and ChiNext

Source: Datastream, Morgan Stanley Research. Data as of Oct 22, 2026.

*No investment recommendation is made with respect to any of the ETFs or mutual funds referenced herein. Investors should not rely on the information included in making investment decisions with respect to those funds.*

**Exhibit 4:** Comparison of 2024 and 2026 national team stabilization efforts

Source: Datastream, Morgan Stanley Research. Data as of Oct 22, 2026

2) On Oct 15th, Beijing was reported to have asked state-backed funds and companies to: 1) buy equities; 2) called on the National Team to accelerate purchases; and 3) ask major insurers to report equity positions and avoid realizing losses on underwater positions. There has also been market discussion around window guidance being given to select institutional investors to restrain selling.

This suggests the buying isn't merely opportunistic by Huijin/state fu
coordinated policy intent to interrupt the negative feedback loop.

3) On Oct 19th, CSIRC Chairman Mr. Wu Qing reinforced the market
publicly in his October Financial Street Forum speech. He specificall
would -

人在草木间

- put stability first;
- strengthen and improve market-stabilization mechanisms;
- broaden the sources/channels for medium- and long-term money entering equities;
- deepen mutual-fund reform to enlarge the market's "stabilizing force";
- encourage qualified listed companies to increase buybacks and shareholder stake increases;
- approve the first 18 actively managed ETFs (going live on Oct 23rd), explicitly noting that they would introduce additional capital.

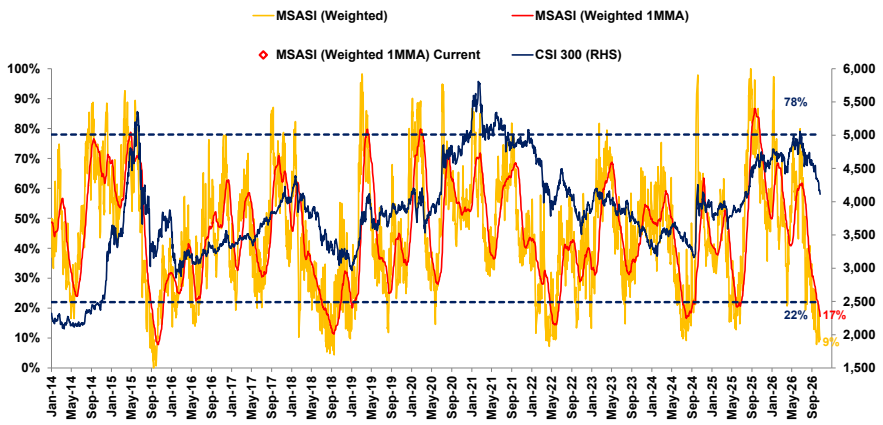

4) Corporate/state-sector buybacks are being mobilized as a second stabilization channel. National Team's market stabilization effort should not be taken as narrowly defined Central Huijin purchase activity. In fact, there is a broader architecture behind the "National Team" itself.

The well-known **Stock Buyback and Shareholding Increase Re-lending Facility** (originally launched in Oct 2024) now has much easier terms than when it was launched. Loan maturity has been extended from one to three years, required own-capital contribution reduced from 30% to 10%, and SOE capital-operation platforms have been made eligible. Since inception, A-share companies have applied for 1,113 buybacks/increased loans with a maximum value of ~Rmb233bn (out of the RMB300bn quota).

## MS A-share sentiment hitting technical rebound threshold

**Our Morgan Stanley proprietary A-share sentiment Index** now sits below our technical rebound signal level at 22% for a month as of Oct 21 ( Exhibit 5 ) (China Equity Strategy: A-Share Sentiment Remains Near July 2024 Levels for Third Week). Historically, more often than not, a meaningful index level rebound has been likely to follow within the next 1-2 months' time.

**Exhibit 5:** MS A-share Sentiment Indicator: MSASI weighted and MSASI weighted 1MMA

Source: CEIC, Bloomberg, Wind, RIMES, Morgan Stanley Research. Data as of Oct 21, 2026.

In conclusion, we continue to prefer the onshore A-share market given its distinctive liquidity support from the National Team and other market stabilization efforts, while the rest of the world (including the Hong Kong market) could still be subject to geopolitical risks and macro/funding cost uncertainties.

So far, in our view, what has happened demonstrates that Beijing is currently trying to change the marginal supply/demand balance and establish a floor without brute-force intervention. This more proactive messaging and still ample dry powder (National Team sold over US$150bn in Jan - June), based on historical experience, suggests that stabilization of the A-share market could be more visible now, likely within another month or two, or so.

## Analyst Certification

The following analysts hereby certify that their views about the companies and their securities discussed in this report are accurately expressed and that they have not received and will not receive direct or indirect compensation in exchange for expressing specific recommendations or views in this report: Laura Wang; Vicky Wu.

.

## Global Research Conflict Management Policy

Morgan Stanley Research has been published in accordance with our conflict management policy, which is available at www.morganstanley.com/institutional/research/ . A Portuguese version of the policy can be found at www.morganstanley.com.br

## Important Regulatory Disclosures on Subject Companies

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

## STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

## Global Stock Ratings Distribution

(as of September 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

| | Coverage Universe | | Investment Banking Clients (IBC) | | | Other Material Investment Services Clients (MISC) | |
|---|---|---|---|---|---|---|---|
| Stock Rating Category | Count | % of Total | Count | % of Total IBC | % of Rating Category | Count | % of Total Other MISC |
| Overweight/Buy | 1599 | 43% | 455 | 48% | 28% | 783 | 44% |
| Equal-weight/Hold | 1563 | 42% | 394 | 42% | 25% | 763 | 43% |
| Not-Rated/Hold | 2 | 0% | 1 | 0% | 50% | 1 | 0% |
| Underweight/Sell | 570 | 15% | 96 | 10% | 17% | 227 | 13% |
| Total | 3,734 | | 946 | | | 1774 | |

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

## Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

## Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

## Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/ res.

For Morgan Stanley specific disclosures, you may refer to https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

## Other Important Disclosures

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.
