We expect growth to rise further in October, due mainly to a low base for a broad range of activity data and some *targeted* policy support. Excluding base effects, underlying growth momentum may remain soft, as we expect sequential growth indicators to show domestic weakness. Export growth is likely to remain strong, but a large part of the strength is likely to have been driven by price effects. With backloaded government bond issuance and the deployment of policy bank lending, government spending may start to pick up, while the fiscal multiplier might be largely muted on an impaired credit system. Following the release of Q3 GDP data, we *raised* our Q4 and 2026 full-year growth forecasts to 4.8% y-o-y and 4.7%, respectively, from 4.5% and 4.5%. However, we believe markets may look past a higher Q4 GDP growth number and focus more on the growth outlook for next year, for which we maintain our below-consensus GDP growth forecast of 4.0% for 2027 (Consensus: 4.4%).

We expect the PMIs to reflect domestic weakness

The official manufacturing and non-manufacturing PMIs are likely to moderate to 49.8 and 50.0, respectively, in October from 50.1 and 50.2 in September, as the improvement in September was mainly seasonal. The Rating Dog manufacturing PMI, which surveys more SMEs and exporters, is likely to remain robust in October at 52.0, which compares with 52.1 in September, due to the strong momentum in exports.

Growth in major activity data may rise on favourable base effects

On major activity data, due to a low bases, we expect growth in industrial production and fixed asset investment to increase to 5.8% y-o-y and -2.3%, respectively, in October from 5.5% and -7.2% in September. Retail sales growth is likely to remain muted at 1.2% y-o-y in October, little improved from 1.1% in September. Amid the global AI supercycle, export growth in USD may advance to 38.0% y-o-y in October from 36.3% in September.

We expect stable headline inflation amid rising oil prices

We expect CPI inflation to edge down to 0.8% y-o-y in October from 0.9% in September, as lower food and gold prices more than offset higher oil and chip prices. Sequential CPI inflation is likely to moderate to 0.1% m-o-m in October from 0.2% in September, slightly below 0.2% in October 2025. We expect PPI inflation to ease to 4.9% y-o-y in October, after hitting a new high of 5.0% in September, due mainly to lower prices of non-oil raw materials, including coal and chemicals, despite higher oil prices. On a sequential basis, we project flat PPI inflation in October, down from 1.2% m-o-m in September and 0.1% in October 2025.

A rebound in credit growth on strong government bond issuance

We expect credit growth, measured as y-o-y growth in outstanding aggregate financing (AF), to rebound to 7.3% in October from a record low of 7.1% in September. Corporate bond issuance remains a drag, but a very strong month of government bond issuance should more than offset it. Growth in outstanding RMB loans is likely to stay at its record low of 4.8% y-o-y in October, unchanged from September.

Production Complete: 2026-10-30 15:54 UTC

See Appendix A-1 for analyst certification, important disclosures and the status of non-US analysts.

October data preview

Official manufacturing PMI in October: 49.8 (September: 50.1)

Official non-manufacturing PMI in October: 50.0 (September: 50.2)

RatingDog manufacturing PMI in October: 52.0 (September: 52.1)

We expect the official manufacturing PMI to moderate to 49.8 in October, reflecting a pullback following a seasonal rebound to 50.1 in September from 49.8 in August. October is a seasonally weak month, with its m-o-m change in October averaging -0.5pp over the past five years. The high-frequency data also bode poorly for October. The Emerging Industries PMI (EPMI) rose to 58.0 in October from 52.3 in September. The rise was mainly seasonal. The 5.7pp m-o-m gain in October was less than the 7.3pp increase a year earlier.

The official non-manufacturing PMI is likely to soften to 50.0 in October from 50.2 in September, owing to tepid travel demand during the National Day Golden Week holiday. Amid rising fuel prices, overall holiday passenger trips rose by just 0.6% y-o-y during the holiday, well below the 3.5% gain recorded during the Labour Day holiday in May. The softness was mainly driven by weaker road and air travel demand, which more than offset the resilience of rail travel. Falling stock markets might also weigh on consumer sentiment.

We expect the RatingDog manufacturing PMI (formerly the Caixin manufacturing PMI), which surveys more SMEs and exporters in the eastern coastal region of China, to remain robust in October, at 52.0, little changed from 52.1 in September. Growth in weekly container throughput remained solid at 10.3% y-o-y on 1-25 October and compared with 10.5% in September. Amid the global AI uptrend, growth in imports from Korea advanced to 154.4% y-o-y on 1-20 October from 123.1% in September, while growth in exports to Korea quickened to 71.1% from 42.8%.

Industrial production growth in October: 5.8% y-o-y (September: 5.5%)

We expect industrial production (IP) growth to rise to 5.8% y-o-y in October from 5.5% in September, due mainly to a low base. Month-on-month growth in IP was -6.3% in October 2025, well below the average of -4.5% in 2020-24.

On high frequency data, oil-related industrial activity remained subdued. The operating rate of Shandong oil teapot refineries in October was 0.9pp above last October's levels, down from 1.7pp above in September. The operating rate of purified terephthalic acid (PTA) factories was 2.6pp below last October's levels, slightly below 2.4pp below in September. The operating rate of polyester filament yarn (PFY) factories in Jiangsu and Zhejiang provinces was 19.1pp below last October's levels, slightly below 18.0pp below in September.

For the construction-related sector, the weekly operating rate of cement factories increased to 3.3pp above last October's levels from 2.0pp above in September. The weekly cement shipment-to-output ratio increased to 4.9pp above last October's levels from 1.2pp above in September. Growth in weekly steel rebar output at major steel mills increased to -15.1% y-o-y in October from -19.0% in September, while output growth of crude steel was unchanged at -5.3% y-o-y. Growth in the daily average volume of coal burned at power plants in eight provinces in South China moderated to -0.4% y-o-y in October from 2.1% in September.

Export growth in October: 38.0% y-o-y (September: 36.3%)

Import growth in October: 35.9% y-o-y (September: 31.0%)

Trade balance in October: USD126.1bn (September: USD133.5bn)

We expect export growth to rise to 38.0% y-o-y in October from 36.3% in September. Export momentum should stay strong in the near term, helped further by a very low base: last year, export growth fell to -1.1% y-o-y in October from 8.3% in September.

We expect import growth to stay strong and climb to 35.9% y-o-y in October from 31.0% in September, also helped by a much lower base. Higher crude oil prices should keep feeding into China's import values in October, owing to the 20-day-plus shipping window from the Persian Gulf to China. That said, we expect China's crude oil import volumes to stay firmly in negative growth territory in October. Rising prices across a range of semiconductor products, especially memory chips, should also push import values higher.

As a result, we expect the trade surplus to narrow modestly to USD126.1bn in October from USD133.5bn in September.

Higher-frequency trade-related data

According to the Ministry of Transport, container throughput at major ports grew a strong 10.1% y-o-y month-to-date in October (weekly data as of 27 October). That is slightly below September's 10.5%.

On imports, the China Import Dry Bulk Freight Index (CDFI) tracks freight rates for dry bulk cargo shipped into China, including iron ore, coal, grain and nickel ore. It is up 36.5% y-o-y month-to-date in October, down from 51.5% in September. Growth in Brent crude oil prices jumped again, to 93.5% y-o-y month-to-date in October from 71.7% in September.

CPI inflation in October: 0.8% y-o-y (September: 0.9%)

We expect CPI inflation to edge down to 0.8% y-o-y in October from 0.9% in September, as lower food and gold prices more than offset higher oil and chip prices. Sequential CPI inflation is likely to moderate to 0.1% m-o-m in October from 0.2% in September, slightly below 0.2% in October 2025.

On food prices, according to high-frequency data from the MARA, the agricultural product wholesale price index fell by 2.7% m-o-m in October, following a 1.5% rise in September, with its year-on-year change at -5.7%, down from -1.4% in September. By food category, vegetables and fruit were major drags, with their inflation falling to -18.9% y-o-y and -5.7%, respectively, in October from -8.9% and -3.9% in September. Egg prices fell markedly by 12.1% m-o-m in October, with inflation dropping to 27.9% y-o-y from 34.7% in September. Amid a low base, pork inflation rose to -12.4% y-o-y in October from -16.9% in September.

For energy prices, retail gasoline prices were raised by RMB385/tonne on 25 September and by RMB435/tonne on 30 October, leading to a sequential gain of 4.3% m-o-m in October and a 0.13pp boost to headline month-on-month CPI inflation.

For gold, its average spot price fell by 4.6% m-o-m in October, with its year-on-year change at 1.8%, down from 18.0% in September. We estimate gold could shave headline year-on-year CPI inflation by 0.08pp in October.

PPI inflation in October: 4.9% y-o-y (September: 5.0%)

We expect PPI inflation to ease to 4.9% y-o-y in October, after hitting a new high of 5.0% in September, due mainly to lower prices of non-oil raw materials, including coal and chemicals, despite higher oil prices. On a sequential basis, we project a flat PPI inflation in October, down from 1.2% m-o-m in September and 0.1% in October 2025.

For raw material-related indices, the month-on-month change in prices of Nanhua industrial raw materials fell to -1.4% in October from 7.0% in September. The month-on-month change in prices of raw materials tracked by the NBS dropped to 0.4% in October from 6.1% in September. Amid the standoff in the Middle East, average Brent prices increased by another 8.0% m-o-m in October, following a 28.5% jump in September, with its year-on-year change rising to 80.3% from 71.7%. The price of coking coal fell by 12.1% m-o-m in October, following a 20.5% gain in September, with its year-on-year rate dropping to 46.9% from 76.2% in September. For precious metals, due to a high base, global LME metal price inflation fell to 26.3% y-o-y in October from 36.6% in September.

Retail sales growth in October: 1.2% y-o-y (September: 1.1%)

We expect retail sales growth to edge up to 1.2% y-o-y in October from 1.1% in September. Underlying consumption momentum is still weighed down by payback effects from the scaled-back trade-in programme, subdued consumer confidence and weaker demand for domestic fuel and consumer electronics as imported inflation pushes prices higher.

By component, we expect retail sales growth in autos, catering and merchandise excluding autos of -20.8% y-o-y, 1.7% and 3.5%, respectively, in October versus September readings of -21.2%, 2.1% and 3.5%.

On auto sales, the China Passenger Car Association (CPCA) has not yet released its advance estimate for October. CPCA data for 1-26 October show passenger car retail sales down 26% y-o-y in volume terms. Based on that, we expect volume growth to stay deeply negative, at around -25% y-o-y (September: -28.0%). Autos should remain the

main drag on headline retail sales, reflecting the scaled-back trade-in programme and the increase in the EV purchase tax from zero to 5%, effective January 2026.

Elsewhere, catering growth is likely to stay soft. Spending over the National Day Golden Week holiday was lacklustre, and the base from last year is high. Growth in merchandise excluding autos should stay subdued, with the major durable goods categories still affected by the payback from the trade-in programme. Households are also likely to cut back on fuel and consumer electronics, as imported inflation pushes prices up.

FAI growth in October: -2.3% y-o-y (September: -7.2%)

FAI growth in October: year-to-date: -6.7% y-o-y (September: -7.2%)

Fixed asset investment (FAI) growth increased to -7.2% y-o-y in September from -10.6% in August, and we expect its growth to increase further to -2.3% in October, thanks to a low base and policy support, with its year-to-date growth rising to -6.7% y-o-y in October from -7.2% in September. On the base effect, FAI growth was -12.6% m-o-m in October 2025, well below the October average of -7.9% in 2022-24. On policy support, the uptick in government bond issuance and the deployment of RMB800bn in new policy financing tools (NPFT) might channel state capital to fund major projects and stabilize investment. As of 28 October, three policy banks have fully disbursed their annual NPFT quotas, including RMB365bn for China Development Bank, RMB315bn for Agricultural Development Bank of China and RMB120bn for Export-Import Bank of China.

Property investment growth in October (single-month): -26.0% y-o-y (September: -26.2%)

Property investment growth in October (year-to-date): -21.0% y-o-y (September: -20.6%)

We expect property investment to continue to contract sharply, at -26.0% y-o-y in October, little changed from -26.2% in September. On high-frequency data, growth in new home sales by floor space in the Wind survey of 20 major cities fell further to -16.9% y-o-y in October from -10.7% in September. By city tier, the weakness was broad-based across city tiers, as sales growth in tier-1, tier-2 and lower-tier cities was 0.9% y-o-y, -28.6% and -15.7%, respectively, in October, and compares with September readings of 6.9%, -19.4% and -16.3%. Growth in existing home sales volumes in a sample of 18 cities quickened to 21.9% y-o-y in October from 6.7% in September. On home prices, the Iceberg index, a leading indicator based on the lowest listing housing prices, recorded a 0.7% m-o-m decline in October, little changed from in September.

Aggregate financing (AF) in October: RMB1,339bn (September: RMB3,548bn)

New RMB loans in October: RMB292bn (September: RMB1,080bn)

Outstanding AF growth in October: 7.3% y-o-y (September: 7.1%)

Outstanding RMB loan growth in October: 4.8% y-o-y (September: 4.8%)

M2 growth in October: 7.5% y-o-y (September: 7.2%)

We expect credit growth, measured as y-o-y growth in outstanding aggregate financing (AF), to rebound to 7.3% in October from a record low of 7.1% in September. Corporate bond issuance remains a drag, but a very strong month of government bond issuance should more than offset it. Growth in outstanding RMB loans is likely to stay at its record low of 4.8% y-o-y in October, unchanged from September.

In absolute terms, we forecast new AF of RMB1,339bn and new RMB loans of RMB292bn in October. Both are above year-earlier levels of RMB818bn and RMB220bn, respectively.

On bond issuance, deal-level data from Wind show that net government bond financing – for both central and local governments – reached RMB1,140bn month-to-date in October (as of 29 October), notably above its year-earlier level of RMB528bn.

Among other major bond categories (as of 29 October), net corporate bond financing totalled RMB291bn, below its year-earlier level of RMB369bn. Net bond financing for LGFVs was RMB7.7bn, above its year-earlier level of -RMB58bn. Property developers' net bond financing was RMB24bn, above its year-earlier level of RMB10bn.

Short-term liquidity conditions were broadly stable in October. The average DR007 edged down to 1.338% on a month-to-date basis (September:1.398%), lower than the PBoC's 7-

day OMO reverse repo rate of 1.40%. Further out on the curve, the monthly average 10-year CGB yield fell to 1.649% from 1.682%.

report indicates that the individual is employed by PT Verdhana Sekuritas Indonesia ('Verdhana') to provide research assistance to NIHK under a research partnership agreement and neither Verdhana nor such individual is licensed outside of Indonesia.

THIS MATERIAL IS: (I) FOR YOUR PRIVATE INFORMATION, AND WE ARE NOT SOLICITING ANY ACTION BASED UPON IT; (II) NOT TO BE CONSTRUED AS AN OFFER TO SELL OR A SOLICITATION OF AN OFFER TO BUY ANY SECURITIES IN ANY JURISDICTION WHERE SUCH OFFER OR SOLICITATION WOULD BE ILLEGAL; AND (III) OTHER THAN DISCLOSURES RELATING TO THE NOMURA GROUP, BASED UPON INFORMATION FROM SOURCES THAT WE CONSIDER RELIABLE, BUT HAS NOT BEEN INDEPENDENTLY VERIFIED BY NOMURA GROUP.

Other than disclosures relating to the Nomura Group, the Nomura Group does not warrant, represent or undertake, express or implied, that the document is fair, accurate, complete, correct, reliable or fit for any particular purpose or merchantable, and to the maximum extent permissible by law and/or regulation, does not accept liability (in negligence or otherwise, and in whole or in part) for any act (or decision not to act) resulting from use of this document and related data. To the maximum extent permissible by law and/or regulation, all warranties and other assurances by the Nomura Group are hereby excluded and the Nomura Group shall have no liability (in negligence or otherwise, and in whole or in part) for any loss howsoever arising from the use, misuse, or distribution of this material or the information contained in this material or otherwise arising in connection therewith.

Opinions or estimates expressed are current opinions as of the original publication date appearing on this material and the information, including the opinions and estimates contained herein, are subject to change without notice. The Nomura Group, however, expressly disclaims any obligation, and therefore is under no duty, to update or revise this document. Any comments or statements made herein are those of the author(s) and may differ from views held by other parties within Nomura Group. Clients should consider whether any advice or recommendation in this report is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The Nomura Group does not provide tax advice.

The Nomura Group, and/or its officers, directors, employees and affiliates, may, to the extent permitted by applicable law and/or regulation, deal as principal, agent, or otherwise, or have long or short positions in, or buy or sell, the securities, commodities or instruments, or options or other derivative instruments based thereon, of issuers or securities mentioned herein. The Nomura Group companies may also act as market maker or liquidity provider (within the meaning of applicable regulations in the UK) in the financial instruments of the issuer. Where the activity of market maker is carried out in accordance with the definition given to it by specific laws and regulations of the US or other jurisdictions, this will be separately disclosed within the specific issuer disclosures.

This document may contain information obtained from third parties, including, but not limited to, ratings from credit ratings agencies such as Standard & Poor's. The Nomura Group hereby expressly disclaims all representations, warranties or undertakings of originality, fairness, accuracy, completeness, correctness, merchantability or fitness for a particular purpose with respect to any of the information obtained from third parties contained in this material or otherwise arising in connection therewith, and shall not be liable (in negligence or otherwise, and in whole or in part) for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use or misuse of any of the information obtained from third parties contained in this material or otherwise arising in connection therewith. Reproduction and distribution of third-party content in any form is prohibited except with the prior written permission of the related third-party. Third-party content providers do not, express or implied, guarantee the fairness, accuracy, completeness, correctness, timeliness or availability of any information, including ratings, and are not in any way responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use or misuse of such content. Third-party content providers give no express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use. Third-party content providers shall not be liable (in negligence or otherwise, and in whole or in part) for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use or misuse of their content, including ratings. Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase hold or sell securities. They do not address the suitability of securities or the suitability of securities for investment purposes, and should not be relied on as investment advice.

Any MSCI sourced information in this document is the exclusive property of MSCI Inc. ('MSCI'). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be duplicated, reproduced, re-disseminated, redistributed or used, in whole or in part, for any purpose whatsoever, including creating any financial products and any indices. This information is provided on an "as is" basis. The user assumes the entire risk of any use made of this information. MSCI, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all representations, warranties or undertakings of originality, fairness, accuracy, completeness, correctness, merchantability or fitness for a particular purpose with respect to any of this material or the information contained in this material or otherwise arising in connection therewith. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in, or related to, computing or compiling the information have any liability (in negligence or otherwise, and in whole or in part) for any damages of any kind. MSCI and the MSCI indexes are services marks of MSCI and its affiliates.

The intellectual property rights and any other rights, in Russell/Nomura Japan Equity Index belong to Nomura Fiduciary Research & Consulting Co., Ltd. ("NFRC") and FTSE Russell ("Russell"). NFRC and Russell do not guarantee fairness, accuracy, completeness, correctness, reliability, usefulness, marketability, merchantability or fitness of the Index, and do not account for business activities or services that any index user and/or its affiliates undertakes with the use of the Index.

Investors should consider this document as only a single factor in making their investment decision and, as such, the report should not be viewed as identifying or suggesting all risks, direct or indirect, that may be associated with any investment decision. Nomura Group produces a number of different types of research product including, among others, fundamental analysis and quantitative analysis; recommendations contained in one type of research product may differ from recommendations contained in other types of research product, whether as a result of differing time horizons, methodologies or otherwise. The Nomura Group publishes research product in a number of different ways including the posting of product on the Nomura Group portals and/or distribution directly to clients. Different groups of clients may receive different products and services from the research department depending on their individual requirements.

Figures presented herein may refer to past performance or simulations based on past performance which are not reliable indicators of future or likely performance. Where the information contains an expectation, projection or indication of future performance and business prospects, such

forecasts may not be a reliable indicator of future or likely performance. Moreover, simulations are based on models and simplifying assumptions which may oversimplify and not reflect the future distribution of returns. Any figure, strategy or index created and published for illustrative purposes within this document is not intended for “use” as a “benchmark” as defined by the European Benchmark Regulation. Certain securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of, or income derived from, the investment.

With respect to Fixed Income Research: Recommendations fall into two categories: tactical, which typically last up to three months; or strategic, which typically last from 6-12 months. However, trade recommendations may be reviewed at any time as circumstances change. ‘Stop loss’ levels for trades are also provided; which, if hit, closes the trade recommendation automatically. Prices and yields shown in recommendations are taken at the time of submission for publication and are based on either indicative Bloomberg, LSEG or Nomura prices and yields at that time. The prices and yields shown are not necessarily those at which the trade recommendation can be implemented.

Nomura’s research services may utilize artificial intelligence tools, including third-party platforms, to assist with data analysis and other research-related activities. Any AI-generated output is subject to review and oversight by the research analyst(s) primarily responsible for the substance of this report and a qualified supervisor For the avoidance of doubt, the use of AI tools does not constitute investment advice and does not alter the execution-only basis upon which Research Services are provided.

The securities described herein may not have been registered under the US Securities Act of 1933 (the ‘1933 Act’), and, in such case, may not be offered or sold in the US or to US persons unless they have been registered under the 1933 Act, or except in compliance with an exemption from the registration requirements of the 1933 Act. Unless governing law permits otherwise, any transaction should be executed via a Nomura entity in your home jurisdiction.

This document has been approved for distribution in the UK as investment research by NIplc. NIplc is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. NIplc is a member of the London Stock Exchange. This document does not constitute a personal recommendation within the meaning of applicable regulations in the UK, or take into account the particular investment objectives, financial situations, or needs of individual investors. This document is intended only for investors who are 'eligible counterparties' or 'professional clients' for the purposes of applicable regulations in the UK, and may not, therefore, be redistributed to persons who are 'retail clients' for such purposes.

This document has been approved for distribution in the European Economic Area as investment research by Nomura Financial Products Europe GmbH (“NFPE”). NFPE is a company organized as a limited liability company under German law registered in the Commercial Register of the Court of Frankfurt/Main under HRB 110223. NFPE is authorized and regulated by the German Federal Financial Supervisory Authority (BaFin).

This document has been approved by NIHK, which is regulated by the Hong Kong Securities and Futures Commission, for distribution in Hong Kong by NIHK. This document is intended only for investors who are 'professional investors' for the purposes of applicable regulations in Hong Kong and may not, therefore, be redistributed to persons who are not 'professional investors' for such purposes.

This document has been approved for distribution in Australia by NAL, which is authorized and regulated in Australia by the ASIC.

This document has also been approved for distribution in Malaysia by NSM.

In Singapore, this document has been distributed by NSL, an exempt financial adviser as defined under the Financial Advisers Act (Chapter 110), among other things, and regulated by the Monetary Authority of Singapore. NSL may distribute this document produced by its foreign affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. This document is intended for accredited, expert or institutional investors as defined by the Securities and Futures Act (Chapter 289). Where the recipient of this document is not an accredited, expert or institutional investor, NSL accepts legal responsibility for the contents of this document in respect of such recipient only to the extent required by law. Recipients of this document in Singapore should contact NSL in respect of matters arising from, or in connection with, this document. THIS DOCUMENT IS INTENDED FOR GENERAL CIRCULATION. IT DOES NOT TAKE INTO ACCOUNT THE SPECIFIC INVESTMENT OBJECTIVES, FINANCIAL SITUATION OR PARTICULAR NEEDS OF ANY PARTICULAR PERSON. RECIPIENTS SHOULD TAKE INTO ACCOUNT THEIR SPECIFIC INVESTMENT OBJECTIVES, FINANCIAL SITUATION OR PARTICULAR NEEDS BEFORE MAKING A COMMITMENT TO PURCHASE ANY SECURITIES, INCLUDING SEEKING ADVICE FROM AN INDEPENDENT FINANCIAL ADVISER REGARDING THE SUITABILITY OF THE INVESTMENT, UNDER A SEPARATE ENGAGEMENT, AS THE RECIPIENT DEEMS FIT.

Unless prohibited by the provisions of Regulation S of the 1933 Act, this material is distributed in the US, by NSI, a US-registered broker-dealer, which accepts responsibility for its contents in accordance with the provisions of Rule 15a-6, under the US Securities Exchange Act of 1934. The entity that prepared this document permits its separately operated affiliates within the Nomura Group to make copies of such documents available to their clients.

This document has not been approved for distribution to persons other than ‘Authorised Persons’, ‘Exempt Persons’ or ‘Institutions’ (as defined by the Capital Markets Authority) in the Kingdom of Saudi Arabia (‘Saudi Arabia’) or a ’Market Counterparty’ or a 'Professional Client' (as defined by the Dubai Financial Services Authority) in the United Arab Emirates (‘UAE’) or a ‘Market Counterparty’ or a ‘Business Customer’ (as defined by the Qatar Financial Centre Regulatory Authority) in the State of Qatar (‘Qatar’) by Nomura Saudi Arabia, NIplc or any other member of the Nomura Group, as the case may be. Neither this document nor any copy thereof may be taken or transmitted or distributed, directly or indirectly, by any person other than those authorised to do so into Saudi Arabia or in the UAE or in Qatar or to any person other than ‘Authorised Persons’, ‘Exempt Persons’ or ‘Institutions’ located in Saudi Arabia or a ’Market Counterparty’ or a 'Professional Client' in the UAE or a ‘Market Counterparty’ or a ‘Business Customer’ in Qatar. Any failure to comply with these restrictions may constitute a violation of the laws of the UAE or Saudi Arabia or Qatar.
